Models and Tools for Managing Development Processes Bernhard Westfechtel, 2003-07-31 The development of products in disciplines such as mechanical electrical or software engineering is a challenging task Costs have to be reduced the time to market has to be shortened and quality has to be improved Skilled

engineers and sophisticated tools for supporting technical work are necessary prerequisites yet they are not sufficient for meeting these ambitious goals. In addition, the work of developers must be coordinated so that they cooperate smoothly. To this end, the steps of the development process have to be planned; an engineer executing a task must be provided with documents and tools; the results of development activities have to be fed back to management, which in turn has to adjust the plan accordingly; the documents produced in different working areas have to be kept consistent with each other, etc. This book reports on models and tools for managing development processes. It provides both a survey of the current state of the art and presents our own contributions. The material covered in this book is based on research in different engineering disciplines: mechanical, software, and chemical engineering. It presents a unified view on the management of development processes in these disciplines.

Managing Development Junji Nakagawa, 2006-04-18 Globalization in the 1990s provided both opportunities and challenges for developing and transition economies. Though for some it offered the chance to achieve economic growth through active involvement in the integrated and liberalized world economy, it also increased their vulnerability to external shocks and volatility. As a consequence, stakeholders at every level of the development and transition process—international organizations, national governments, and the private sector—had to review their strategies in order to adjust to the new world economic environment. As the Mexican peso crisis of 1994–1995 and the Asian financial crisis of 1997–1998 showed dramatically, the cost of maladjustment was not only very high but it also affected many more stakeholders than before due to the contagious effects of crises. This revealing book analyzes the different methods employed to manage globalization and development. Bringing together an international team of contributors including Barbara Stallings, Alicia Giron, and J. C. Ferraz, it will prove to be a valuable resource for those involved in the fields of development, economics, and political economy.

Sustainable Management Development in Africa Hamid Kazeroony, 2016-04-14 Sustainable Management Development in Africa examines how African management and business scholarship can serve African and multinational management and organizations operating in Africa. In a broader sense, this book, within an African context, explores how human capital and intellectual capabilities can be organized at the higher education level, describes the cultural, social, and political influencers impacting management and organization, helps conceptualize African management theories to address organizational effectiveness, addresses the current management and organizational practices in Africa in identifying challenges, and provides guidance for more effective management and organizational operation. Aimed at researchers, academics, and advanced students alike, this book lays the groundwork for the application of uniquely African theoretical and practical perspectives for sustainable management and organizational operation as explained from a contemporary African point of view. In addition, and most important, this book contains a uniquely African content that allows for developing new theories and examining new ways of doing business, thus reaffirming the rise of African scholarship in the fields of management, organization, and business.

Learning Theory in the Practice of Management Development Sara

Grant,Aharon Kfir,Stephen A. Stumpf,Mary Anne Watson,1998-05-21 The workplace is the ideal environment for tying together management theory and practice and yet classes in many regular management development programs are conducted away from the work site and class sizes are so large that individual instruction is difficult to achieve In this book the authors seek effective ways to merge theory with workplace practice and advocate the modular preceptor method whereby participants work together in dyads and triads with a preceptor acting as advisor and instructor Unlike traditional management development programs which do not usually lead to behavior changes the modular preceptor model has behavior change as the basic aim Participants can remain at work while experiencing individualized learning developing problem solving skills and acquiring new knowledge which can be immediately applied to work situations Various ways of learning such as passive lecture case study discussion and experiential role playing games sensitivity training are examined No single mode of learning can be comprehensive and adequate for all situations The authors contend however that experiential learning is most effective for increasing the will and competence to learn and for using what is learned to change manager behavior The purpose of the modular preceptor approach is not to present answers to specific managerial or organizational problems but to help the participant acquire new problem definition and problem solving skills and the confidence to apply them on the job This book also analyzes the contribution of the behavioral sciences to the philosophies and techniques behind management instruction and examines the role of the university in management development and the future direction of MBA programs For anyone concerned with meaningful and effective management development this book is an invaluable resource

Management Development Alan Mumford,Jeffrey Gold,Chartered Institute of Personnel and Development,2004 Designed for students of Management Development on the CIPD PDS qualification and in business and HR degree programmes this text offers an overview of management development to practitioners It includes features such as chapter outline web links end of chapter discussion questions and summary exercises and searching the web

Reflective Learning in Management, Development and Education David Higgins,2017-07-05 In recent years there has been a growing interest in the ideas surrounding reflective practice specifically in the areas of learning in management development and education This interest has developed in a growing number of professional fields thus making for very diverse understandings of what can be regarded as complex approaches to learning In order to understand how reflective practice can support and aid learning it is helpful to acknowledge how we learn First all learners start from their own position of knowledge and have their own set of experiences to draw upon Second learning is contextual something which managers need to acknowledge To make sense and achieve a deep understanding of material and experiences one needs to relate new information to existing knowledge and experiences This is best achieved through a process of reflection Indeed the underlying rationale for the chapters in this publication is to explore how the role of practice reflection and critical reflection are understood and developed within a learning process which is supported through the application of reflective tools This

book recognises and makes explicit the diverse yet inclusive nature of the field. By including a range of contributions from both subject specific disciplines and professional contexts it seeks to enable the reader in documenting some of the current uses of reflection and critical reflection while also illustrating some of the newer methods in use as well as the current contributions to thinking in the subject domain. Through this publication the editor and authors hope to provide a basis from which continuing professional development and education can be enhanced. This book was originally published as a special issue of *Reflective Practice International and Multidisciplinary Perspectives* (Management Development International Labour Office, 1998). The publication contains a balanced mix of theoretical concepts and practical guidance about management training and development approaches based on best practice used by companies, public sector organisations, training institutions, business schools and management consultants in various countries around the world. Topics discussed include competence modelling and management practices, learning theory, methods and techniques, effective management development and education and aspects of the management development cycle such as problem identification, training needs assessment, training programme design, implementation and monitoring.

Managing Development in a Globalized World Habib Zafarullah, Ahmed Shafiqul Huque, 2017. Traditionally development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations. However, historically eclectic ideas and approaches often clash with existing long established notions of progress and modes of realizing social and economic change. *Managing Development in a Globalized World: Concepts, Processes, Institutions* explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries. It underscores development as a continuous process that must be supported by sound policies and efficient management, supplying a wider understanding of the field. The authors argue that the application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society. They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal, external actors and a host of stakeholders. An exploration of key sectors in development provides clear comprehension of problems and solutions. A careful synthesis of theoretical, conceptual and empirical literature, the book assesses real world situations and provides insight into the operational dynamics of development policies, programs and institutions. It focuses on goals, values and dynamics of development management that are undergoing rapid changes and continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter regional and inter institutional synergies. It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society.
