Myth And Science In The Twelfth Century A Study Of Bernard Silvester:

Myth and Science in the Twelfth Century Brian Stock, 1972 The *Cosmographia* of Bernard Silvester was the most important literary myth written between Lucretius and Dante One of the most widely read books of its time it was known to authors whose interests were as diverse as those of Vincent of Beauvais Dante and Chaucer Bernard offers one of the most profound versions of a familiar theme in medieval literature that of man as a microcosm of the universe with nature as the mediating element between God and the world Brian Stock's exposition includes many passages from the *Cosmographia* translated for the first time into English Arising from the central analysis are several more general themes among them the recreation by twelfth century humanists of the languages of myth and science as handed down in the classical tradition the creation of the world and of man the chief mythical and cosmographical problem of the period the development of naturalistic allegory and Bernard's relation to the new science introduced from Greek and Arabic sources Originally published in 1972 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These paperback editions preserve the original texts of these important books while presenting them in durable paperback editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Birth Passages Theresa M. Krier, 2001 *Birth Passages* offers a provocative and eloquent challenge to the nostalgia for the maternal sometimes influenced by classic Freudian theory which pervades

many discourses Theresa M Krier suggests an alternative to the common characterizations of the maternal as a force inspiring both desire and dread a force that must be repressed if subjectivity and culture are to be established Instead drawing on the work of Melanie Klein D W Winnicott and Luce Irigaray Krier seeks to establish a new model of the relationship between mother and infant one in which birth is seen not as the tragic ending to the prenatal union but rather as the child s claiming both distance from and proximity to this parent Krier s insightful readings of poetic works from antiquity the Middle Ages and the Renaissance show these texts in opposition to their cultures insistent nostalgia for the maternal Their authors she maintains recognize such longing as a symptom of a glamorous but false and disabling fantasy In her analysis of the Song of Songs Lucretius s De rerum natura Chaucer s Parlement of Foules Spenser s Amoretti and Faerie Queene and Shakespeare s Love s Labor s Lost and The Winter s Tale Krier details how the writings represent the intersubjective nature of birth

Ideas in the Medieval West Valerie I.J. Flint,2024-10-28 Without denying the real importance of the more traditional tasks of a historian of ideas or scholar of literature the edition of a text and research into its sources and influence Professor Flint s objective has been to look sideways from the texts so into the society to which their authors belonged Her conviction is that no text and so no idea to which it gave flight can be properly understood unless it is placed firmly within its immediate historical context including of course consideration of the patrons who bore the expense of producing such works Within this framework the author s attention is directed above all at the Christian propaganda the messages a pastor strove to impart of the 11th 12th centuries and the reactions discernable within these to Judaism and even more evident even in scientific treatises to the continued vitality of pagan beliefs and superstitions

A New Material Interpretation of Twelfth-Century Architecture Jason Crow, 2025-10-01 Today we perceive Gothic cathedrals as light filled forms representing the sacred The colored light projected from brightly colored stained glass windows onto the walls and floors of these buildings suggests the presence of divinity Suger 1081-1151 CE the abbot of the monastery of Saint Denis is credited with originating Gothic architecture However focus on form and structure has elided attention to the material out of which medieval churches were made When Suger describes the early church he was replacing he says that the gold and gems it contained beamed outwardly with a gleaming light that filled the eye When he restored his church and filled it with the shining souls of his ecclesia he repeated God's divine act of creation His restored church imitated the precious stones that could be shaped and polished to reveal divine light By crafting stone Suger fulfilled the divine plan to make heaven on earth This book Reassesses the origins and significance of Gothic architecture Approaches the interpretation of the twelfth century church through its materiality Integrates the twelfth century conceptualization of architecture within art science and theology

course of the stars Coupled with the remnants of ancient geometrical astronomy these provided the framework for the rebirth of astronomy with the rise of the medieval universities Intellectual Culture in Medieval Paris Ian P.

Wei,2012-05-03 In the thirteenth century the University of Paris emerged as a complex community with a distinctive role in society This book explores the relationship between contexts of learning and the ways of knowing developed within them focusing on twelfth century schools and monasteries as well as the university By investigating their views on money marriage and sex Ian Wei reveals the complexity of what theologians had to say about the world around them He analyses the theologians sense of responsibility to the rest of society and the means by which they tried to communicate and assert their authority In the late thirteenth and early fourteenth centuries however their claims to authority were challenged by learned and intellectually sophisticated women and men who were active outside as well as inside the university and who used the vernacular an important phenomenon in the development of the intellectual culture of medieval Europe **A Century of**

British Medieval Studies Alan Deyermond,2007-11-29 This is an authoritative guide to the full range of medieval scholarship undertaken in twentieth century Britain history archaeology language culture Some of the twenty nine essays focus on changes in research method or on the achievements of individual scholars others are personal accounts of a lifetime s work *Peter Lombard (2 vols.)* Marcia L. Colish,1993-12-01 The first general study of Peter Lombard c 1100 1160 in a

century this book places Peter s thought in the context of the intellectual debates of his time in the effort to understand the substance of Lombardian theology and the reasons why his principal work the Sentences immediately became a classic of early scholastic theology with a durable influence doing more to shape the education of university theologians and philosophers than any other work of systematic theology for the next four centuries Attention is paid to the sentence collection as a genre of theological literature the problem of theological language with which Peter and his contemporaries wrestled and his contribution to early scholastic biblical exegesis as well as to the development of his systematic theology in the Sentences **The Cultural Context of Medieval Music** Nancy Van Deusen,2011-11-02 An urgently needed guide to

understanding medieval music to be used as a text for the university undergraduate graduate students in music and interdisciplinary medieval studies and for the professional musicologist and medievalist This book will also be appreciated by everyone interested in early music Nancy van Deusen s The Cultural Context of Medieval Music addresses the mental landscape surrounding music that especially was sung and experienced in the Middle Ages Largely anonymous in its composition and apparently lacking the motivation of fame and commerce music within a well thought out system of education served a purpose that goes far beyond casual entertainment or personal professional advancement Offering experience through performance music exemplified the basic principles not only of the material and possible measurements of the visible world such as of objects relationships and movement but also of the invisible materials of sound and time making it an ideal medium for working with unseen substances such as concepts imaginations and ideas St Augustine in the

late fourth century reinforced the importance of music for the process of learning when he wrote that nothing could be truly understood without music This book shows how this in fact is the case a message of great relevance today *The Idea of the Labyrinth from Classical Antiquity through the Middle Ages* Penelope Reed Doob, 2019-03-15 Ancient and medieval labyrinths embody paradox according to Penelope Reed Doob Their structure allows a double perspective the baffling fragmented prospect confronting the maze treader within and the comprehensive vision available to those without Mazes simultaneously assert order and chaos artistry and confusion articulated clarity and bewildering complexity perfected pattern and hesitant process In this handsomely illustrated book Doob reconstructs from a variety of literary and visual sources the idea of the labyrinth from the classical period through the Middle Ages Doob first examines several complementary traditions of the maze topos showing how ancient historical and geographical writings generate metaphors in which the labyrinth signifies admirable complexity while poetic texts tend to suggest that the labyrinth is a sign of moral duplicity She then describes two common models of the labyrinth and explores their formal implications the unicursal model with no false turnings found almost universally in the visual arts and the multicursal model with blind alleys and dead ends characteristic of literary texts This paradigmatic clash between the labyrinths of art and of literature becomes a key to the metaphorical potential of the maze as Doob's examination of a vast array of materials from the classical period through the Middle Ages suggests She concludes with linked readings of four labyrinths of words Virgil's Aeneid Boethius Consolation of Philosophy Dante's Divine Comedy and Chaucer's House of Fame each of which plays with and transforms received ideas of the labyrinth as well as reflecting and responding to aspects of the texts that influenced it Doob not only provides fresh theoretical and historical perspectives on the labyrinth tradition but also portrays a complex medieval aesthetic that helps us to approach structurally elaborate early works Readers in such fields as Classical literature Medieval Studies Renaissance Studies comparative literature literary theory art history and intellectual history will welcome this wide ranging and illuminating book
