Number And Inner Space A Study Of Grammatical Number In English:

Number and Inner Space W. H. Hirtle, 1982 **Grammatical Number in English Nouns** Mark A. Wickens, 1992-03-12

Apart from the coverage given to it in the grammars number in English nouns has received relatively little attention especially in the area of theoretical considerations Guided by the principles of psychomechanics Hirtle 1982a put forth a fairly elaborate theory of number in English nouns The aim of this work is to provide evidence to validate parts of Hirtle's theory to verify some of his analyses and to investigate several problems some of which are mentioned in his work as subjects for further research Specific areas treated are ailment nouns liquid names ending in ings binary objects abstract s and external singulars

The Semantics of Grammar Anna Wierzbicka, 1988-01-01 The semantics of grammar presents a radically semantic approach to syntax and morphology It offers a methodology which makes it possible to demonstrate on an empirical basis that syntax is neither autonomous nor arbitrary but that it follows from semantics It is shown that every grammatical construction encodes a certain semantic structure which can be revealed and rigorously stated so that the meanings encoded in grammar can be compared in a precise and illuminating way within one language and across language boundaries The author develops a semantic metalanguage based on lexical universals or near universals and ultimately on a system of universal semantic primitives and shows that the same semantic metalanguage can be used for explicating lexical grammatical and pragmatic aspects of language and thus offers a method for an integrated linguistic description based on semantic foundations Analyzing data from a number of different languages including English Russian and Japanese the author explores the notion of ethnosyntax and via semantics links syntax and morphology with culture She attempts to demonstrate that the use of a semantic metalanguage based on lexical universals makes it possible to rephrase the Humboldt Sapir Whorf hypothesis in such a way that it can be tested and treated as a program for empirical research

The Structure of Modern English Laurel J. Brinton, 2000 This text is designed for undergraduate and graduate students interested in contemporary English especially those whose primary area of interest is English as a second language Focus is placed exclusively on English data providing an empirical explication of the structure of the language

Linguistic Theory and Empirical Evidence Bob de Jonge, Yishai Tobin, 2011 This volume further elaborates the empirical tradition of Columbia School CS Linguistics by offering diverse empirical analyses for a wide variety of languages These studies open a much needed debate advocating the necessity of the independent validation of linguistic hypotheses This research exemplifies how such a validation should be conducted by determining which forms underlie the analyses and extracting those observations that are considered to be objective The volume consists of two parts a section on synchronic and diachronic grammatical problems and a section on Phonology as Human Behavior PHB the Columbia School version of phonology applied to evolutionary developmental and clinical issues and the phonotactics of the selected lexicon of a literary text It provides a wealth of useful empirical data and in depth and sophisticated qualitative and quantitative analyses of a broad range of

languages from diverse families French Spanish Afrikaans Dutch English Polish Russian Japanese and Hebrew **Between Grammar and Lexicon** Ellen Contini-Morava, Yishai Tobin, 2000-04-15 This volume has its origins in a theme session entitled Lexical and Grammatical Classification Same or Different from the Fifth International Cognitive Linguistics Conference It includes theme session presentations additional papers from that conference and several invited contributions All the articles explore the relationship between lexical and grammatical categories both illustrating the close interaction as well as questioning the strict dichotomy between them This volume promotes a holistic view of classification reflecting functional cognitive communication and sign oriented approaches to language which have been applied to both the grammar and the lexicon The volume is divided into two parts Part I Number and Gender Systems Across Languages is further subdivided into three sections 1 Noun Classification 2 Number Systems and 3 Gender Systems Part II Verb Systems and Parts of Speech Across Languages is divided into two sections 1 Tense and Aspect and 2 Parts of Speech The analyses represent a diverse range of languages and language families Bantu Swahili Guaykuran Pilag Indo European English Russian Polish Bulgarian Macedonian Spanish and Semitic Hebrew Meaning as Explanation Ellen Contini-Morava, Barbara S.
