

ELEMENTS OF PANTHEISM

A Spirituality of Nature
and the Universe
Third edition

Richard Dawkins has called pantheism "sexed-up atheism." At the heart of modern scientific pantheism is reverence for Nature and the Universe. It offers a challenging alternative, beyond theism and atheism, with a joyful approach to our lives and a caring concern for all life on this earth. Pantheism is a 2,500 year-old belief system espoused by many famous thinkers and artists including Lao Tzu, Heraclitus, Spinoza, Wordsworth, Whitman, Emerson, Einstein and Carl Sagan.

Today pantheism is seeing a revival as the underlying world view of many environmentalists, of leading scientists, of nature-revering pagans, and of non-theists looking for a more embracing perspective. This accessible and authoritative handbook is the only available introduction to the history, theory and practice of pantheism.

Systematic Theology John Miley, 1892

Pollution and the Death of Man Francis A. Schaeffer, Udo W. Middelmann, 2011-03-02 At the creation of the world God gave mankind the responsibility to exercise dominion over the earth Man was to use the earth and its abundance of resources to satisfy his physical needs but he was also to care for the earth and its creatures as a wise and godly steward Reading about endangered species or another oil spill will make it abundantly clear that the human race has failed miserably in its God given mandate How did we get to this point Where should we go from here This classic by Francis Schaeffer now repackaged looks at contemporary ecological crises through

the lens of theology and Scripture Renowned for his work in applied philosophy and theology Schaeffer answers serious philosophical questions about creation and ecology He concludes that we must return to a profoundly and radically biblical understanding of God's relationship to the earth and of our divine mandate to exercise godly dominion over it Repackaged and republished Pollution and the Death of Man carries an important and relevant message for our day With concluding chapter by Udo Middelmann Outlines of Theology Archibald Alexander Hodge, 1878 *Fortress Introduction to Contemporary Theologies* Ed.
