Lifespan Development in Context David N. Sattler,2000 *Child Development in a Life-Span Perspective* E. Mavis Hetherington,Richard M. Lerner,Marion Perlmutter,2013-04-15 Comprised of papers written by members of the Social Science Research Council Subcommittee on Child Development in Life Span Perspective this book provides a representation of the current status of the relation between child development and the life span It suggests the possible synthesis of these two fields from both conceptual and empirical evidence Theories and methods concerning the social psychological and anatomical influences on children s cognitive development through adolescence are highlighted Perspectives on Lifespan Development Lara Mayeux,2011-08-01 **Lifespan Development** Jason Low,Paul Jose,2006 **Life-span Developmental Psychology** E. Mark Cummings,Anita L. Greene,Katherine H. Karraker,2014-01-02 Although there has been a significant increase in studies of stress and coping processes in recent years researchers have often approached these topics from rather narrow and constrained perspectives Furthermore little communication has occurred across disciplines and research directions resulting in the emergence of several relatively isolated literatures An outgrowth of the Eleventh Biennial West Virginia University Conference on Life Span Development this volume emphasizes two major themes the importance of taking a life span approach to the study of stress and coping and the development of new and more complete conceptual models of stress and coping processes The first to approach these subjects from a life span perspective this book includes papers by distinguished researchers from each of the major periods of the life span and brings together the cognitive and socioemotional traditions in the study of dealing with pressures The editors hope that this facilitation of communication among researchers with diverse views will help create a broadening and integration of perspectives **Lifespan Development** Susan Krauss Whitbourne,Cynthia R. Davis,2021-02-18 Lifespan Development Biopsychosocial Perspectives provides students with complete explorations of each developmental stage of the lifespan beginning with conception and concluding with an examination of successful aging The book presents human development theory and research within a biopsychosocial framework presenting information regarding biological psychological and social functioning during each significant period of the lifespan The first chapter of the text presents readers with an introduction to human development addressing the meaning of age and aging the four key principles of human development the social factors that influence the study of human development and more The succeeding chapters progress in step with the human lifespan beginning with conception and prenatal development moving through infancy childhood adolescence and adulthood and concluding with chapters devoted to later life The biopsychosocial perspective of the text emphasizes the transactional nature of biological psychological and social influences on the developing individual with a focus on positive development and the implications on health and wellness It emphasizes the applied nature of the biopsychosocial perspective Each chapter begins with a real life scenario challenging students to take the perspectives of individuals and practitioners dealing with issues at every stage of

development Designed to provide readers with a holistic understanding of the complex progression of human life and aging
