Phenomenology Of Natural Law:

Phenomenology of Natural Law Wilhelmus Luijpen, 1967 *Natural Law* G. W. F. Hegel, 2011-07-12 One of the central problems in the history of moral and political philosophy since antiquity has been to explain how human society and its civil institutions came into being. In attempting to solve this problem, philosophers developed the idea of natural law which for many centuries was used to describe the system of fundamental rational principles presumed universally to govern human behavior in society. By the eighteenth century the doctrine of natural law had engendered the related doctrine of natural rights which gained reinforcement most famously in the American and French revolutions. According to this view, human society arose through the association of individuals who might have chosen to live alone in scattered isolation and who in coming together were regarded as entering into a social contract. In this important early essay first published in English in this definitive translation in 1975 and now returned to print, Hegel utterly rejects the notion that society is purposely formed by voluntary association. Indeed, he goes further than this, asserting in effect that the laws brought about in various countries in response to force, accident, and deliberation are far more fundamental than any law of nature supposed to be valid always and everywhere. In expounding his view, Hegel not only dispenses with the empiricist explanations of Hobbes, Hume, and others but also at the heart of this work offers an extended critique of the so-called formalist positions of Kant and Fichte.

Ideas for a Hermeneutic Phenomenology of the Natural Sciences Joseph J. Kockelmans, 1993-07-31 I have always had a great interest in the philosophy of science. At first, this interest led to reflections on the mathematical sciences. I later my focus shifted to the natural sciences. During the past twenty years or so, my interest has also included the behavioral, social, and historical sciences. From the very start, my interest was always combined with a concern for the history of the sciences. In philosophy of science proper, my main interest was not in logical, methodological, or even epistemological issues, although I obviously studied and taught the most important insights proposed in the leading publications in this large field of study. My concern has always been predominantly ontological, and in that area I have approached the relevant issues from a phenomenological perspective. For what follows, it is perhaps of some importance to mention here that I came to phenomenology in a rather indirect way through the philosophy of Nicolai Hartmann. Yet it was mainly the influence of Herman Van Breda and Alphonse De Waelhens which led me directly to Husserl's phenomenology. At first, I focused almost exclusively on Husserl's phenomenology. Later, I moved in the direction of the philosophy of Merleau-Ponty and Heidegger. Cf. Joseph J. Kockelmans, *Philosophy of Mathematics in the Middle Ages* in Dutch, Langemark-Vonksteen 1953; *On the Mode of Being of Mathematical Entities* in Dutch, in *Tijdschrift voor Filosofie* 16 (1954) pp. 289-331; 2. The Natural Law Foundations of Modern Social Theory Daniel Chernilo, 2013-01-31 After several decades in which it became a prime target for critique, universalism remains one of the most important issues in social and political thought. Daniel Chernilo reassesses social theory's universalistic orientation and explains its origins in natural law theory using an

impressive array of classical and contemporary sources that include among others Habermas Leo Strauss Weber Marx Hegel Rousseau and Hobbes The Natural Law Foundations of Modern Social Theory challenges previous accounts of the rise of social theory recovers a strong idea of humanity and revisits conventional arguments on sociology's relationship to modernity the enlightenment and natural law It reconnects social theory to its scientific and philosophical roots its descriptive and normative tasks and its historical and systematic planes Chernilo's defense of universalism for contemporary social theory will surely engage students of sociology political theory and moral philosophy alike Natural Law & the Secular Mythos Gregory Morgan, 2025-02-20 This book argues that natural law when construed as an epistemological and trans cultural lingua franca adjudged capable of legitimating the rational intelligibility and universal applicability of specific Christian moral principles within contemporary secular discourse has failed Through a detailed analysis of the contributions of three prominent natural law theorists who are located within a shared philosophical theological tradition namely John Finnis Jean Porter and John Milbank the text illuminates the extent to which this failure is as much intramural as it is extramural Morgan explores how new horizons open up for natural law if the theological unsaid's are allowed to surface and the disremembering power of the secular mythos is overcome The final chapter's of the book addresses one such horizon that the theoretical fulcrum of the natural law lies not in its perceptual self evidence or in its immanent secularity but rather in its subtle provision of an immanent eschatology **Phenomenology of Law and Normativity** Panos Theodorou, Pedro Manuel Santos Alves, Anna Irene Baka, 2024-09-16 Against the widespread mainstream take on the philosophy of law this collected volume fills an important scholarly gap by introducing a phenomenological account of some of the major questions and themes of jurisprudence such as rights and norms This volume argues that wherever there is a demand for grounding normativity the phenomenological method can provide a priori albeit corrigible access to essential truths with reference to beings and their social relationships The present work reflects upon the place and potential impact on the theory of law and normativity stemming from the phenomenology of Edmund Husserl largely overlooked by legal philosophers and legal theorists Further coverage contains those who have built upon these ideas of Husserl such as Martin Heidegger Alfred Schutz Edith Stein Emmanuel Levinas and Adolf Reinach This text addresses new issues and questions from the general perspective of the phenomenology of law It is a response to those critical of phenomenology by presenting sober arguments in support of its potential for achieving a deeper grasp of legal normative concepts such as rights claims obligations promises and apologies Boundaries between law and morality as well as legal and social ontologies are approached from a phenomenological perspective It appeals to students researchers and professionals working in phenomenology ethics legal philosophy and human rights theory and practice *The Philosophy of Mathematics and Natural Laws* Noel Curran, 2019-07-23 First published in 1997 this title is a sequel to Dr Noel Curran's first book The Logical Universe The Real Universe published by Ashgate under the Avebury imprint 1994 The philosophy of mathematics in this book is based on ideas

of Sir William Rowan Hamilton on the ordinal character of numbers the real numbers the measure numbers scalar numbers and the extension to vectors The final extension is to Hamilton's quaternions This algebra is interpreted as the mathematics of spin This led to a new theory of time and space which is Euclidian The motion of spin is absolute no frame of reference is required If time is assumed to have a beginning it would be asymmetric with an arrow This concept is applied to the laws of nature which are symmetrical This is another Copernican Revolution in three aspects absolute time is restored time has an arrow is asymmetric and thirdly the theory is based on the motion of spin which is absolute and more fundamental than the motion of translation This opens the way to the final unification of physics The Natural Law Heinrich Albert

Philosophy's Nature: Husserl's Phenomenology, Natural Science, and Metaphysics Emiliano Trizio, 2020-08-31 This book offers a systematic interpretation of the relation between natural science and metaphysics in Husserl's phenomenology It shows that Husserl's account of scientific knowledge is a radical alternative to established methods and frameworks in contemporary philosophy of science The author's interpretation of Husserl's philosophy offers a critical reconstruction of the historical context from which his phenomenological approach developed as well as new interpretations of key Husserlian concepts such as metaphysics idealization life world objectivism crisis of the sciences and historicity The development of Husserl's philosophical project is marked by the tension between natural science and transcendental phenomenology While natural science provides a paradigmatic case of the way in which transcendental phenomenology ontology empirical science and metaphysics can be articulated it has also been the object of philosophical misunderstandings that have determined the current cultural and philosophical crisis This book demonstrates the ways in which Husserl shows that our conceptions of philosophy and of nature are inseparable Philosophy's Nature will appeal to scholars and advanced students who are interested in Husserl and the relations between phenomenology natural science and metaphysics

The Philosophy of Hegel Allen Speight,2014-12-05 Few philosophers can induce as much puzzlement among students as Hegel His works are notoriously dense and make very few concessions for a readership unfamiliar with his systematic view of the world Allen Speight s introduction to Hegel s philosophy takes a chronological perspective on the development of Hegel s system In this way some of the most important questions in Hegelian scholarship are illuminated by examining in their respective contexts works such as the Phenomenology and the Logic Speight begins with the young Hegel and his writings prior to the Phenomenology focusing on the notion of positivity and how Hegel s social economic and religious concerns became linked to systematic and logical ones He then examines the Phenomenology in detail including its treatment of scepticism the problem of immediacy the transition from consciousness to self consciousness and the emergence of the social and historical category of Spirit The following chapter explores the Logic paying particular attention to a number of vexed issues associated with Hegel s claims to systematicity and the relation between the categories of Hegel s logic and nature or spirit Geist The final chapters discuss Hegel s ethical and political thought and the three elements of his notion of absolute spirit art religion and philosophy as well as the importance of history to his philosophical approach as a whole
