

В палате для больничной одежды должны быть предусмотрены вешалки или шкафы. Нельзя хранить одежду на табуретках, стульях, тумбочках.

Гигиена нательного белья

У хирургических больных целесообразно ограничиться минимумом нательного белья (за исключением больных с общим режимом), так как последнее:

- неминуемо загрязняется и является потенциальным источником инфекционной опасности;
- требует достаточно частой замены, что неизбежно причиняет много беспокойства больному процедурой переодевания;
- часто собирается в складки, которые создают дополнительные неудобства и могут служить причиной развития пролежней;
- в той или иной степени затрудняет проведение гигиенических мероприятий, а также лечебных и диагностических манипуляций.

В особенности это касается очень или крайне тяжелых больных, двигательная активность которых ограничена пределами постели. Малейшие неровности на белье причиняют им дополнительные страдания. Кроме того мероприятия по гигиене тела у этих больных проводятся достаточно часто, и даже минимальная дополнительная травматизация (в частности, связанная с заменой белья) не желательна. Поэтому крайне тяжелые хирургические больные (например, в реанимационных отделениях) часто находятся без нательного белья. У менее тяжелых хирургических больных из нательного белья бывает достаточно одной нательной («ночной») рубашки. Она должна быть удобной, легко заменяемой. Такая нательная рубашка шьется:

- из негрубой хлопчатобумажной ткани светлых тонов (хорошо впитывает пот, не нарушает дыхательной, терморегулирующей функций кожи, на светлом фоне легко заметить загрязнения);
- свободного, простого («мешковатого») покроя, не ограничивающего дыхательных движений;
- с достаточно большими прорезями для головы и рук;
- с минимальным количеством швов, «рубцами наружу»;
- без застежек, завязок, пуговиц;
- по длине до верхней или средней трети бедер.

Для тяжелобольных используются также рубашки в виде детских распашонок.

Смена нательного белья проводится индивидуально по мере надобности (при загрязнении), но в любом случае не реже 1 раза в неделю.

Больные с общим, полупостельным режимами, а также часть пациентов с обычным постельным режимом переодеваются самостоятельно.

Больных со строгим постельным режимом и находящихся в тяжелом состоянии переодевает медперсонал. Чтобы сменить у такого больного натель-
