Power Crime And Mystification:

Power, Crime and Mystification Steven Box, 2002-11-01 Power Crime and Mystification is one of the classics of radical criminology a compelling account of how power and powerlessness operate within the criminal justice system Questioning the orthodox view that it is powerlessness that leads to serious criminal behaviour Steven Box focuses on the serious crimes committed by those in positions of power and privilege particularly in government agencies and multinational corporations He also points out that some relatively powerless groups such as women hardly commit any serious crimes at all He suggests that crime can be the extreme form of otherwise socially sanctioned behaviour and in taking this approach provides coherent answers to the questions How does a society define crime and What is the difference between justice and social control A major implication of Steven Box's stimulating analysis is that definitions of serious crime the criminal justice process and government penal policies are all in need of review So far these have been more concerned with regulating controlling and demoralizing relatively powerless groups than with tackling real crime

Criminology Yvonne Jewkes, Gayle Letherby, 2002-07-24 This reader provides a thorough grounding in issues related to the study of crime the criminal justice system and social control The editors indicate crime's varied and conflicting history as well as its current debates The mixture of historical and more recent readings shows a variety of perspectives

Targeting Domestic Abuse with Police Data Matthew P. Bland,Barak Ariel,2020-09-29 This book explores the potential of domestic abuse data to assess the level of harm caused to victims and the amount of resources required to respond to it Policing domestic abuse has become a major activity for the police service in England and Wales Part of the police strategy is to gather hundreds of thousands of detailed records about victims and suspects the single largest set of domestic abuse records available but one that to date has largely unexplored by researchers In this volume Matthew Bland and Barak Ariel analyse three substantial datasets taken from police forces across the country and ask Can police data be used to derive meaningful insight How should we use these data to measure harm Just how much domestic abuse involves a repeat victim Does abuse get more serious over time Can serious domestic abuse be predicted before it occurs This volume illustrates the scale of the challenge the police and other agencies face with reducing domestic abuse A small proportion of individuals generate a majority of harm this book argues that police records offer opportunities to identify these individuals before the harm occurs Demonstrating that statistical techniques can be used to profile domestic abuse to target harm reduction strategies more precisely and even identify a sizable proportion of serious cases before they occur this volume will be of interest to law enforcement officials policing researchers and policy makers interested in reducing the phenomenon of domestic abuse

Leaving Islam, Ex-Muslims and Zemiology Weronika Lenartowicz, 2024-02-28 Cases of ex Muslims in Europe being punished by their former fellow Muslims constitute an unacceptable practice from the standpoint of democratic societies in which human rights are respected and individuals have the freedom to choose their religion or none at all Ex Muslims fear of punishment by their former community should prompt an open candid and measured discussion of the issue Leaving Islam Ex Muslims and Zemiology presents the reasons for and consequences of consciously leaving Islam based on interviews with 80 ex Muslims currently living in Germany and Sweden In their view many of the practices and beliefs of Islam are harmful and unfair Many parts of the Islamic world regard apostasy as treason or a crime As a result emphasis in the book is shifted from crime to harm and a thesis is put forward concerning the decriminalization of apostasy from the perspective of zemiology The book highlights how a broader shift of interest in the democratic structures of Europe could allow ex Muslims to join the discussion on the guaranteed right to religious liberties and freedom of speech in the context of the apostasy law in Islam This should happen without fear for their own security and without facing potential suppression or social exclusion It will appeal to scholars with interest in Islam and the conflict between religious values and an individual's aspirations and needs
