Reading Putnam:

Reading Putnam Maria Baghramian, 2013 Hilary Putnam is one of the world's leading philosophers. His highly original and often provocative ideas have set the agenda for a variety of debates in philosophy of science, philosophy of mind, and philosophy of language. His now famous philosophical thought experiments such as the Twin earth and the brains in the vat have become part of the established canon in philosophy and cognitive science. *Reading Putnam* is an outstanding overview and assessment of Hilary Putnam's work by a team of international contributors and includes replies by Putnam himself. Divided into clear sections, it contains chapters on key aspects of Putnam's large body of writing, including Scientific realism and the changes that Putnam's thought has undergone on this topic, analyticity and ontology, including the important interconnections between the views of Putnam and Quine. Putnam's arguments concerning externalist views of meaning and reference, questions of conceptual relativity, and his preoccupation with ethics through a denial of the fact-value dichotomy. Putnam's developing views on perception. Offering an excellent survey of Putnam's work, *Reading Putnam* is essential for those studying philosophy of mind, philosophy of language, and philosophy of science, as well as for anyone interested in contemporary philosophy.

Following Putnam's Trail, 2015-06-29 *Following Putnam's Trail* addresses Putnam's path through important philosophical problems. One outstanding feature of Putnam's philosophy has been his contribution to the development of American pragmatism, as well as his many changes of mind when thinking about realism. Realism and pragmatism are indeed the central focus of the contributions to the volume. The book includes a defence of pragmatism by Putnam himself and several commentaries on it. This volume should be of interest both to scholars who specialize in analytical philosophy, as well as to those who have a wider interest in philosophy.

Putnam's Library Companion, 1878 Wiley and Putnam's Literary News-letter, and Monthly Register of New Books, Foreign and American, 1844 *Mansions of the Dead*

Sarah Stewart Taylor, 2004-07 In this dynamite follow-up to the acclaimed debut *OU Artful Death*, Harvard art historian Sweeney St George investigates the murder of one of her students.

Humanizing Mathematics and its Philosophy Bharath Sriraman, 2017-11-07 This *Festschrift* contains numerous colorful and eclectic essays from well-known mathematicians, philosophers, logicians, and linguists celebrating the 90th birthday of Reuben Hersch. The essays offer, in part, attempts to answer the following questions set forth by Reuben himself as a focus for this volume: Can practicing mathematicians, as such, contribute anything to the philosophy of math? Can or should philosophers of math, as such, say anything to practicing mathematicians? Twenty or fifty years from now, what will be similar and what will or could or should be altogether different? About the philosophy of math. About math education. About math research institutions. About data processing and scientific computing. The essays also offer glimpses into Reuben's fertile mind and his lasting influence on the mathematical community, as well as revealing the diverse roots, obstacles, and philosophical dispositions that characterize the working lives of mathematicians. With contributions from a veritable who's who list of 20th-century luminaries from mathematics and

philosophy as well as from Reuben himself this volume will appeal to a wide variety of readers from curious undergraduates to prominent mathematicians *Hilary Putnam's Philosophical Naturalism* Massimo Dell'Utri, 2024-04-12 Hilary Putnam's *Philosophical Naturalism Making Philosophy Matter for Life* emphasizes both the nature of Hilary Putnam's link to the Neopositivist tradition and his progressive critical departure from it Massimo Dell'Utri argues that one of the main senses of this departure resides in implicitly revealing that there is no opposition between philosophy concerned with hard technical questions and philosophy concerned with how to live It is this innovative combination that made Putnam offer what is widely regarded as the most sensible interpretation of philosophical naturalism ever articulated From the latter comes a multilevel image of reality the realization of which required a lifelong reflection not only on science and its importance but also on mathematics knowledge mind truth religion morality and more This variegated reflection provides insight into how despite shifts in opinion Putnam's thought reveals strong continuities and a systematic backbone issues of central philosophical importance

Real Knowing Linda Martín Alcoff, 2018-10-18 Real knowing always involves a political dimension Linda Martín Alcoff suggests But this does not mean we need to give up realism or the possibility of truth Recent work in continental philosophy insists on the influence that power and desire exert on knowing whereas contemporary analytic philosophy largely ignores these political concerns in its accounts of justification and truth Alcoff engages these traditionally conflicting approaches in a constructive dialogue effectively spanning the analytic continental divide In provocative readings of major figures in the continental tradition Alcoff shows that the work of Hans Georg Gadamer and Michel Foucault can help rectify key problems in coherence epistemology such as the link between coherence and truth She also argues that discussions about knowledge among continental philosophers can benefit from the work of analytic philosophers Donald Davidson and Hilary Putnam on meaning

and ontology Alcoff makes a compelling case for the need to address truth as a metaphysical issue in contrast to minimalist tendencies in Anglo American philosophy and deconstructionism on the continent Her work persuasively argues for coherentist epistemology as a more realistic reconfiguration of the ontology of truth **Language, Mind and Reality**

Alston,2018-08-06 Throughout the past century a debate has raged over the thesis of realism and its alternatives Realism the seemingly commonsensical view that all or most of what we encounter in the world exists and is what it is independently of human thought has been vigorously denied by such prominent intellectuals as Jacques Derrida Michel Foucault Richard Rorty Thomas Kuhn Hilary Putnam and Nelson Goodman The opponents of realism among them historians and social scientists who support social constructionism hold that all or most of reality depends on human conceptual schemes and beliefs In this volume of original essays a group of philosophers explores the ongoing controversy The book opens with an introduction by William P Alston whose writing on the subject has been widely influential Selected essays then compare and contrast aspects of the arguments put forward by the realists with those of the antirealists Other chapters discuss the importance of the debate for philosophical topics such as epistemology and for domains ranging from religion literature and science to morality **Intelligence and Spirit** Reza Negarestani,2019-02-12 A critique of both classical humanism and dominant trends in posthumanism that formulates the ultimate form of intelligence

as a theoretical and practical thought unfettered by the temporal order of things In Intelligence and Spirit Reza Negarestani formulates the ultimate form of intelligence as a theoretical and practical thought unfettered by the temporal order of things a real movement capable of overcoming any state of affairs that from the perspective of the present may appear to be the complete totality of history Intelligence pierces through what seems to be the totality or the inevitable outcome of its history be it the manifest portrait of the human or technocapitalism as the alleged pilot of history Building on Hegel's account of Geist as a multiagent conception of mind and on Kant's transcendental psychology as a functional analysis of the conditions of possibility of mind Negarestani provides a critique of both classical humanism and dominant trends in posthumanism The assumptions of the former are exposed by way of a critique of the transcendental structure of experience as a tissue of subjective or psychological dogmas the claims of the latter regarding the ubiquity of mind or the inevitable advent of an unconstrained superintelligence are challenged as no more than ideological fixations which do not stand the test of systematic scrutiny This remarkable fusion of continental philosophy in the form of a renewal of the speculative ambitions of German Idealism and analytic philosophy in the form of extended thought experiments and a philosophy of artificial languages opens up new perspectives on the meaning of human intelligence and explores the real potential of posthuman intelligence and what it means for us to live in its prehistory

Modern Philosophy of Language Maria Baghramian,1999-09-17 A collection of seminal writings on the philosophy of language In our century philosophers have become increasingly concerned with the relationship between language the mind and the world Language has come to be viewed both as a source of puzzlement and as a repository for untapped knowledge The philosophy of language is an attempt to understand the nature of language and to explore the link between what we say and what we intend Modern Philosophy of Language brings together the most significant writings on language in twentieth century philosophy from the work of Gottlob Frege Bertrand Russell and the logical positivists to the contemporary contributions of W V O Quine Noam Chomsky and Michael Dummett The articles collected here are benchmarks in the development of various strands in the modern analytic philosophy of language

Beyond the Analytic-Continental Divide Jeffrey A. Bell,Andrew Cutrofello,Paul M. Livingston,2015-08-27 This forward thinking collection presents new work that looks beyond the division between the analytic and continental philosophical traditions one that has long caused dissension mutual distrust and institutional barriers to the development of common concerns and problems Rather than rehearsing the causes of the divide contributors draw upon the problems methods and results of both traditions to show what post divide philosophical work looks like in practice Ranging from metaphysics and philosophy of mind to political philosophy and ethics the papers gathered here bring into mutual dialogue a

wide range of recent and contemporary thinkers and confront leading problems common to both traditions including methodology ontology meaning truth values and personhood Collectively these essays show that it is already possible to foresee a future for philosophical thought and practice no longer determined neither as analytic nor as continental but instead as a pluralistic synthesis of what is best in both traditions The new work assembled here shows how the problems projects and ambitions of twentieth century philosophy are already being taken up and productively transformed to produce new insights questions and methods for philosophy today
