Migrant Writing Deborah Reed-Danahay,Helena Wulff,2023-10-24 This book brings fresh perspectives to the anthropology of migration It focuses on what migrants write and how anthropologists may incorporate insights gained from engagement with this writing into research methods and writing practices The volume includes a range of contributions from leading scholars in the field all organized around a striking set of questions about the conditions in which migrant narratives are written and translated the audiences for which they are intended the genres and media through which they are disseminated and what such stories include or leave out The contributors to this volume demonstrate an innovative shift in anthropological methods by showing how fiction and nonfiction graphic memoir and autoethnography song lyrics as well as social media posts and images unsettle the power dynamics in the study of migration narrative This book will serve as important supplemental reading for courses on migration literary anthropology ethnographic methods and sociocultural anthropology in general Its interdisciplinary perspective will appeal to a broad range of scholars and students with interests in migration narrative and anthropological writing genres *Science Education during Early Childhood* Wolff-Michael Roth,Maria Ines Mafra Goulart,Katerina Plakitsi,2012-10-12 Children's learning and understanding of science during their pre school years has been a neglected topic in the education literature something this volume aims to redress Paradigmatic notions of science education with their focus on biologically governed development and age specific accession to scientific concepts have

perpetuated this state of affairs This book offers a very different perspective however It has its roots in the work of cultural historical activity theorists who since Vygotsky have assumed that any higher cognitive function existed in and as a social relation first Accepting this precept removes any lower limit we may deem appropriate on children s cognitive engagement with science related concepts The authors describe and analyze the ways in which children aged from one to five grapple with scientific concepts and also suggest ways in which pre service and in service teachers can be prepared to teach in ways that support children s development in cultural and historical contexts In doing so the book affirms the value of cultural historical activity theory as an appropriate framework for analyzing preschool children s participation in science learning experiences and shows that that the theory provides an appropriate framework for understanding learning as well as for planning and conducting training for pre school teachers

First-Person Methods Wolff-Michael Roth, 2012-07-30 In the history of psychology first person methods such as

introspection have come into disrepute in favor of the experimental approach Yet the results of first person research such as the famous studies provided by Maurice Merleau Ponty in his Phenomenology of Perception have indeed produced knowledge subsequently ascertained by neuroscientific research The purpose of this book is to assist readers in developing first person methods as a rigorous approach It is designed to assist researchers in the field of education to develop their competencies in the first person approach Concrete examples descriptions precepts and possible findings are provided to guide readers in their inquiries Surrounding the inquiries reflective commentaries assist readers to become reflexively aware of what they are doing and thereby come to bring into discourse the methods they have used That is readers are assisted in developing research praxis by experiencing first person methods first hand and then to become reflexively aware of the method as method

Reading Kant's Geography Stuart Elden, Eduardo Mendieta, 2011-09-01 For almost forty years German enlightenment philosopher Immanuel Kant gave lectures on geography more than almost any other subject Kant believed that geography and anthropology together provided knowledge of the world an empirical ground for his thought Above all he thought that knowledge of the world was indispensable to the development of an informed cosmopolitan citizenry that would be self ruling While these lectures have received very little attention compared to his work on other subjects they are an indispensable source of material and insight for understanding his work specifically his thinking and contributions to anthropology race theory space and time history the environment and the emergence of a mature public This indispensable volume brings together world renowned scholars of geography philosophy and related disciplines to offer a broad discussion of the importance of Kant's work on this topic for contemporary philosophical and geographical work Ancient Egypt and the East, 1927 Reading Popol Wuj Nathan C. Henne, 2020-04-14 Popol Wuj is considered one of the oldest books in the Americas Various elements of Popol Wuj have appeared in different written forms over the last two millennia and several parts of Popol Wuj likely coalesced in hieroglyphic book form a few centuries before contact with Europeans Popol Wuj offers a unique interpretation of the Maya world and ways of being from a Maya perspective However that perspective is often occluded since the extant Popol Wuj is likely a copy of a copy of a precontact Indigenous text that has been translated many times since the fifteenth century Reading Popol Wuj offers readers a path to look beyond Western constructions of literature to engage with this text through the philosophical foundation of Maya thought and culture This guide deconstructs various translations to ask readers to break out of the colonial mold in approaching this seminal Maya text Popol Wuj or Popol Vuh in its modern form can be divided thematically into three parts cosmogony the formation of the world tales of the beings who inhabited the Earth before the coming of people and chronicles of different ethnic Maya groups in the Guatemala area Examining thirteen translations of the K'iche' text Henne offers a decolonial framework to read between what translations offer via specific practice exercises for reading studying and teaching Each chapter provides a close reading and analysis of a different critical scene based on a comparison of several translations English and Spanish of a key K'iche' word or phrase in

order to uncover important philosophical elements of Maya worldviews that resist precise expression in Indo European languages Charts and passages are frontloaded in each chapter so the reader engages in the comparative process before reading any leading arguments This approach challenges traditional Western reading practices and enables scholars and students to read Popol Wuj and other Indigenous texts from within the worldview that created them **Handbook of**
