Spiro, Michael DeSchryver, Michelle Schira Hagerman, Paul M. Morsink, Penny Thompson, 2015-03-05 The Internet is transforming the experience of reading and learning through reading Is this transformation effecting a radical change in reading processes as readers synthesize understandings from fragments across multiple texts Or conversely is the Internet merely a new place to use the same reading skills and processes developed through experience with traditional print based media Are the changes in reading processes a matter of degree or are they fundamentally new And if so how must reading theory research and instruction adjust This volume brings together distinguished experts from the fields of reading research teacher education educational psychology cognitive science rhetoric and composition digital humanities and educational technology to address these questions Every question is not answered in every chapter How could they be But every contributor has many thoughtful things to say about a subset of these important questions Together they add up to a comprehensive response to the issues the field faces as it approaches what may well be or not a crossroads A website devoted to extending discussion around the book in creative and disjunctive ways readingatacrossroads.net moves it beyond the printed page **The Book's Road in the Age of Digitization** Janina Krieger, 2023-01-28 Although every area of life is permeated by digital processes the majority of Germans seem to resist digital alternatives with regard to the activity of reading The printed book continues to enjoy much greater popularity than the eBook This seems surprising since the entire communication behavior has moved to digital devices So what lies behind this Why are there still printed books in digital times Previous studies of the printed book have focused primarily on its media future as this seemed threatened by digitization In this work Janina Krieger instead examines the past from three

perspectives in order to gain insights into the present While other studies always chose one method and these mostly belonged to the quantitative approach here three subjects are identified which are examined with different methods and in their combination can provide an answer to the research question the consumers of literature the readers literature itself the selected genre is the novel and the media theories of the 20th century which have already dealt with media change *Fifty Ways to Practice Reading* Belinda Young-Davy,2016-05-10 This book is made for students of English as a Second or Foreign Language revised and updated for 2023 Learn 50 ways to practice and improve reading skills By applying these methods you will read faster and better and remember information longer The book is divided into six sections 1 Good Habits 2 Finding Reading Material 3 Reading Strategies 4 Handling Vocabulary 5 Working with Longer Texts 6 Reading for Pleasure You do not need to be living in an English speaking country or be currently taking an English class to use this book However students who are already in a class can also use this book to study and learn more effectively **OECD Factbook 2014**
