Early American Nature Writers Daniel Patterson, 2007-11-30 At a time when the environment is of growing concern to students and general readers nature writing is especially meaningful This book profiles the literary careers of 52 early American nature writers such as John James Audubon Ralph Waldo Emerson Caroline Stansbury Kirkland Thomas Jefferson Henry David Thoreau and Mabel Osgood Wright Each entry is written by an expert contributor and discusses the writer's life and works Entries close with primary and secondary bibliographies and the encyclopedia ends with suggestions for further reading Global warming pollution and other issues have made the environment a topic of constant discussion these days Many environmental concerns were treated by early American nature writers who recognized the beauty of the natural world

in an age of commercial expansion Some of the most famous writers of the 18th and 19th centuries wrote about nature and their works are stylistic masterpieces At a time when students are being encouraged to read and write about nonfiction these masterworks of early American nature writing are all the more important This book gives students and general readers a welcome introduction to early American nature writers Writing the Environment in Nineteenth-Century American Literature Steven Petersheim, Madison Jones IV, 2015-09-17 The nineteenth century roots of environmental writing in American literature are often mentioned in passing and sometimes studied piece by piece Writing the Environment in Nineteenth Century American Literature The Ecological Awareness of Early Scribes of Nature brings together numerous explorations of environmentally aware writing across the genres of nineteenth century literature Like Lawrence Buell the authors of this collection find Thoreau s writing a touchstone of nineteenth century environmental writing particularly focusing on Thoreau s claim that humans may function as scribes of nature However these studies of Thoreau s antecedents contemporaries and successors also reveal a range of other writers in the nineteenth century whose literary treatments of nature are often more environmentally attuned than most readers have noticed The writers whose works are studied in this collection include canonical and forgotten writers men and women early nineteenth century and late nineteenth century authors pioneers and conservationists They drew attention to the conflicted relationships between humans and the American continent as experienced by Native Americans and European Americans Taken together these essays offer a fresh perspective on the roots of environmental literature in nineteenth century American nonfiction fiction and poetry as well as in multi genre compositions such as the travel writings of Margaret Fuller Bringing largely forgotten voices such as John Godman alongside canonical voices such as Nathaniel Hawthorne Herman Melville Walt Whitman and Emily Dickinson the authors whose writings are studied in this collection produced a diverse tapestry of nascent American environmental writing in the nineteenth century From early nineteenth century writers such as poet Philip Freneau and novelist Charles Brockden Brown to later nineteenth century conservationists such as John James Audubon and John Muir Scribes of Nature shows the development of an environmental consciousness and a growing conservationist ethos in American literature Given their often surprisingly healthy respect for the natural environment these nineteenth century writers offer us much to consider in an age of environmental crisis The complexities of the supposed nature culture divide still work into our lives today as economic and environmental issues are often seen at loggerheads when they ought to be seen as part of the same conversation of what it means to live healthy lives and to pass on a healthy world to those who follow us in a world where human activity is becoming increasingly threatening to the health of our planet *Mapping Region in Early American Writing* Edward Watts, Keri Holt, John Funchion, 2015-11-15 Mapping Region in Early American Writing is a collection of essays that study how early American writers thought about the spaces around them The contributors reconsider the various roles regions imagined politically economically racially and figuratively played in the formation of American communities both real and imagined

These texts vary widely some are canonical others archival some literary others scientific some polemical others simply documentary As a whole they recreate important mental mappings and cartographies and they reveal how diverse populations imagined themselves their communities and their nation as occupying the American landscape Focusing on place specific local writing published before 1860 Mapping Region in Early American Writing examines a period often overlooked in studies of regional literature in America More than simply offering a prehistory of regionalist writing these essays offer new ways of theorizing and studying regional spaces in the United States as it grew from a union of disparate colonies along the eastern seaboard into an industrialized nation on the verge of overseas empire building They also seek to amplify lost voices of diverse narratives from minority frontier and outsider groups alongside their more well known counterparts in a time when America s landscapes and communities were constan

The Environment and the Press Mark Neuzil,2008-07-16 This history of environmental journalism looks at how the practice now defines issues and sets the public agenda evolving from a tradition that includes the works of authors such as Pliny the Elder John Muir and Rachel Carson It makes the case that the relationship between the media and its audience is an ongoing conversation between society and the media on what matters and what should matter

Imaginary Citizens Courtney Weikle-Mills,2013-01-15 How did Ichabod Crane and other characters from children s literature shape the ideal of American citizenship 2015 Honor Book Award Children s Literature Association From the colonial period to the end of the Civil War children s books taught young Americans how to be good citizens and gave them the freedom autonomy and possibility to imagine themselves as such despite the actual limitations of the law concerning child citizenship Imaginary Citizens argues that the origin and evolution of the concept of citizenship in the United States centrally involved struggles over the meaning and boundaries of childhood Children were thought of as more than witnesses to American history and governance they were representatives of the people in general Early on the parent child relationship was used as an analogy for the relationship between England and America and later the president was equated to a father and the people to his children There was a backlash however In order to contest the patriarchal idea that all individuals owed childlike submission to their rulers Americans looked to new theories of human development that limited political responsibility to those with a mature ability to reason Yet Americans also based their concept of citizenship on the idea that all people are free and accountable at every age Courtney Weikle Mills discusses such characters as Goody Two Shoes Ichabod Crane and Tom Sawyer in terms of how they reflect these conflicting ideals

Pagan Roots Yvonne Aburrow, 2025-04-22 Have you ever been told that

prayer is not a Pagan practice or that it is just passive magic and found that these claims did not sit right with you Or that you ought to kill the ego because that is supposedly part of every spiritual quest but that did not feel right to you Have you ever been presented with a spiritual practice or concept and wondered if it was compatible with your Pagan ideals and values Have you ever asked yourself why there are certain words you just can't say in Pagan circles Or have you had a conversation with an adherent of another religion and found it difficult to communicate because they did not understand where you were coming from Fascinated by the etymology of words and the history of ideas Yvonne Aburrow has set out to disentangle Pagan spirituality from ideas that do not serve the needs of Pagans and to reclaim religious concepts that have been rejected Just as there are people who assume that religion does not change over the centuries there are people who assume that the meaning of words does not change The meaning of words and the concepts they represent do change over time and are shaped by the context in which they are used Yvonne Aburrow is here with *Pagan Roots* to illustrate those changes and reclaim religious language and concepts in a way that centers contemporary Pagan practice and belief *Fallen Forests* Karen L.

Richard Schneider, 2016-10-04 In *The Ecological Thought* eco philosopher Timothy Morton has argued for the inclusion of dark ecology in our thinking about nature Dark ecology he argues puts hesitation uncertainty irony and thoughtfulness back into ecological thinking The ecological thought he says should include negativity and irony ugliness and horror Focusing on this concept of dark ecology and its invitation to add an anti-pastoral perspective to ecocriticism this collection of essays on American literature and culture offers examples of how a vision of nature's darker side can create a fuller understanding of humanity's relation to nature Included are essays on canonical American literature on new voices in American literature and

on non print American media This is the first collection of essays applying the dark ecology principle to American literature

Captivity Literature and the Environment Kyhl Lyndgaard, 2016-08-12 In his study of captivity narratives Kyhl Lyndgaard argues that these accounts have influenced land use policy and environmental attitudes at the same time that they reveal the complex relationship between ethnicity landscape and authorship In connecting these themes Lyndgaard offers readers an alternative environmental literature one that is dependent on an understanding of nature as home rather than as a place of temporary retreat He examines three captivity narratives written in the 1820s and 1830s A Narrative of the Life of Mrs Mary Jemison The Captivity and Adventures of John Tanner and Life of Black Hawk all of which engage with the Jacksonian policy of Indian removal and resist tropes of the so called Vanishing Indian As Lyndgaard shows the authors and the editors with whom they collaborated often saw their stories as a plea for environmental and social justice At the same time audiences have embraced them for their vision of a more inclusive and less exploitative American society than was proffered by the rhetoric of Manifest Destiny Their legacy is that while environmental and social justice has been slow in fulfilment their continued popularity testifies to the fact that the struggle for justice has never been ceded *The Bloomsbury Handbook of Contemporary American Poetry* Craig Svonkin, Steven Gould Axelrod, 2023-01-12 With chapters written by leading scholars such as Steven Gould Axelrod Cary Nelson and Marjorie Perloff this comprehensive Handbook explores the full range and diversity of poetry and criticism in 21st century America The Bloomsbury Handbook of Contemporary American Poetry covers such topics as Major histories and genealogies of post war poetry from the language poets and the Black Arts
