## **Readings In Aging And Death:**

**Readings in Aging and Death** Steven H. Zarit, 1977 A major purpose of the book is to explore the processes of development in the later years and their impact on people's lives This search is not without pain or disappointment however involvement with older persons will bring students into contact with people who often long for human contact who can be wise or sad or funny or foolish but who give us a sense of our past and a view of the present that otherwise would be lost to us There is a special delight in bridging over age differences with warmth and understanding In addition to our personal enrichment a balanced view of aging emphasizing both the continuing strengths and abilities as well as the difficulties that may confront the old is of value to the student who may enter a profession that directly serves older persons or who may work as a volunteer or for relating to one's parents when they are old Ultimately too we should gain some perspective on our own aging In this book there has been an attempt to present aging from a variety of perspectives in articles that are free from excessive professional jargon They have been chosen as reflective of the major issues in the field of gerontology Basic concepts of the aging process are presented in the initial two sections **Readings in Aging and Death**, 1977
