Readings In Biomedical Ethics A Canadian Focus:

Readings in Biomedical Ethics Eike-Henner W. Kluge, 2005 A balanced collection of readings that examine the diversity of opinion surrounding current issues in biomedical ethics This anthology focuses largely on the Canadian perspective covering the political and social aspects of Canadian access to health care and the distinct nature of Canadian legislation Nevertheless it also includes articles from other countries to reflect the general field of bioethics [Readings in Biomedical Ethics](#) Eike-Henner W. Kluge, 2013-04-01

Biomedical Ethics Johnna Fisher, Alister Browne, Leslie Burkholder, J. S. Russell, 2018-02-12 With seventy classic and contemporary readings and thirty nine case studies this comprehensive anthology introduces students to the main moral debates and issues faced by practitioners in the medical professions *Bioethics in Canada, Third Edition* Carol Collier, Rachel Haliburton, 2021-03-25 Now in its third edition Bioethics in Canada A Philosophical Introduction offers a comprehensive overview of the philosophical historical and medical concepts shaping contemporary debates on biomedical issues The text opens with an introduction to moral theory and bioethical principles followed by application of these theories and principles to real world ethical conflicts involving abortion distributive justice genetics reproductive technology and other vital topics A landmark case opens each chapter illuminating the many issues involved in these debates as well as the philosophical assumptions that shape them Thoroughly updated to reflect recent political medical and cultural changes this third edition features new sections on Medical Assistance in Dying MAiD the moral philosophy of liberalism in bioethics the Mad movement CRISPR and gene editing and expanded content on mental health rural and remote communities and codes of conduct and codes of ethics Accessibly written with newly added case studies in the health care workplace this text is an insightful resource for courses in the disciplines of philosophy health studies medicine and nursing providing a strong ethical foundation in an ever changing field *Ethics for Bioengineers* Monique Frize, 2022-06-01 Increasingly biomedical scientists and engineers are involved in projects design or research and development that involve humans or animals The book presents general concepts on professionalism and the regulation of the profession of engineering including a discussion on what is ethics and moral conduct ethical theories and the codes of ethics that are most relevant for engineers An ethical decision making process is suggested Other issues such as conflicts of interest plagiarism intellectual property confidentiality privacy fraud and corruption are presented General guidelines the process for obtaining ethics approval from Ethics Review Boards and the importance of obtaining informed consent from volunteers recruited for studies are presented A discussion on research with animals is included Ethical dilemmas focus on reproductive technologies stem cells cloning genetic testing and designer babies The book includes a discussion on ethics and the technologies of body enhancement and of regeneration The importance of assessing the impact of technology on people society and on our planet is stressed Particular attention is given to nanotechnologies the environment and issues that pertain to developing countries Ideas on gender culture and ethics focus on how research and access to medical services

have at times been discriminatory towards women The cultural aspects focus on organ transplantation in Japan and a case study of an Aboriginal child in Canada both examples show the impact that culture can have on how care is provided or accepted The final section of the book discusses data collection and analysis and offers a guideline for honest reporting of results avoiding fraud or unethical approaches The appendix presents a few case studies where fraud and or unethical research have occurred Table of Contents Introduction to Ethics Experiments with Human Subjects or Animals Examples of Ethical Dilemmas in Biomedical Research Technology and Society Gender Culture and Ethics Data Collection and Analysis

A Cross-Cultural Dialogue on Health Care Ethics Harold Coward,Pinit Ratanakul,2006-01-01 The ethical theories employed in health care today assume in the main a modern Western philosophical framework Yet the diversity of cultural and religious assumptions regarding human nature health and illness life and death and the status of the individual suggest that a cross cultural study of health care ethics is needed *A Cross Cultural Dialogue on Health Care Ethics* provides this study It shows that ethical questions can be resolved by examining the ethical principles present in each culture critically assessing each value and identifying common values found within all traditions It encourages the development of global awareness and sensitivity to and respect for the diversity of peoples and their values and will advance understanding as well as help to foster a greater balance and a fuller truth in consideration of the human condition and what makes for health and wholeness

Relational Theory Christine M. Koggel,Ami Harbin,Jennifer J. Llewellyn,2025-04-18 Relational theory starts from the ontological fact of our being in networks of relationships and draws out what this means for theories of knowledge and for moral and political theory This book uses insights from feminist relational theory to outline the ontological epistemological and moral political implications of this theoretical approach The chapters in this volume focus on relationships of power and oppression how these relationships shape who is taken to have knowledge and who is dismissed or ignored and what all of this means for theories of equality justice and moral and political theory more generally A focus on relationships of power and oppression opens up an examination into structures such as colonialism and capitalism that shape interconnected networks of relationships between humans and human and non human entities and ecosystems This volume which now includes eight additional chapters published both before and after the original special issue offers a significant step forward in the development of feminist relational theory Following early forays in identifying and criticizing mainstream liberal theory in the Western tradition chapters in this collection draw on approaches by anti oppression theorists found in critical disability critical race anti colonial decolonial and non Western theories to further broaden the descriptions and analyses of relationships and networks of relationships and to extend and advance feminist relational theory and its applications The chapters in this book were originally published in the *Journal of Global Ethics*
