

READINGS IN URBAN ECONOMICS

MASSACHUSETTS INSTITUTE OF TECHNOLOGY

Professor Matthew Edel

Urban economics is a recent addition to most university curricula. The development of this field is a response to the growth of cities in the past decades, and the urban crisis presently affecting this country. Urban economics, is being pulled together into a still loosely-connected whole, out of aspects of land economics, public finance, welfare analysis of public services and other subfields. It would, therefore, be inappropriate at this time to try to present urban economics as a course that could consist only of lectures in which wisdom or theory is dictated. This is an experimental field, and we will be experimenting. We will be more concerned with problems than with tools. Discussions, outside speakers, individual student research, and visits to urban neighborhoods and institutions may well form part of the course.

The course will consider three principal themes: (1) The economics of location decisions, and the influence of these on urban growth and on the real estate market; (2) The evaluation of urban transportation and other services; and (3) The economic development of ghetto neighborhoods. Students will be asked to write a short paper (4-7 pages) on a topic in each of these areas (three papers in all), complete short homework assignments, participate in class discussion, and take a final examination. Half or more of the final examination will consist of the following essay question:

Describe the kind of city which you would consider best as a place to live. What style of life would this city proportion to people of your occupational/educational class, and to those of other classes? What are the economic problems in achieving the existence of cities of the sort you describe in America? How would such a city meet the fundamental economic problems of urbanized areas, including transportation of persons and goods, provision of public services, allocation of land to different uses, municipal finance, distribution of economic and employment opportunities, education, recreation, etc.?

In answering this question, students will be expected to consider all of the work of the course, whatever outside reading for this course or any other they may consider relevant, and whatever feelings about the world they think may be related to the theme. It is suggested that, as a basis for thinking about alternative types of cities, that all students read *Communitas* by Paul and Percival Goodman.

Readings In Economics: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Readings In Economics : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Readings In Economics : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
