D'Lugo,2021-01-12 Spanish filmmaker Carlos Saura who began his career under the censorship of Franco's regime has  
forged an international reputation for his unique cinematic treatment of emotional and spiritual responses to repressive  
political conditions In films such as *Carmen* and *El Dorado* where reality and fantasy are deliberately fused together Saura  
reveals the illusions of Franco's mythologized Spain a chaste Catholic and heroic Spain of the Golden Age that tend to isolate  
Spaniards from the rest of Europe from each other and from their own individuality In this first English language book on  
Saura Marvin D Lugo looks at the social and artistic forces behind this film auteur's highly personal cinema Tracing Saura's  
career over three decades D Lugo discusses each work from *Hooligans* 1959 a realist film about a Madrid street gang  
member trying to become a bullfighter to *The Dark Night* 1989 a film dealing with the persecution of the religious reformer  
St John of the Cross in the late sixteenth century Throughout he argues that Saura's cinematic style results from a highly  
original response to the political and historical constraints of Spanish culture D Lugo shows how in order to explore the  
complex cultural politics of Spanishness as it was institutionalized under Franco Saura frames his narrations through the  
eyes of characters who question the forces that shape personal and collective identity Moving beyond the limits of traditional  
auteur studies this book addresses the relationship between the filmmaker and the cultural ideology that historically has  
thwarted and manipulated the expressions of individuality in Spanish society      **Topology and Geometry of Intersections**

**of Ellipsoids in  $\mathbb{R}^n$**  Santiago López de Medrano,2023-05-24 This book gives an overview of research in the topology and  
geometry of intersections of quadrics in  $\mathbb{R}^n$  with a focus on intersections of concentric ellipsoids and related spaces  
Unifying and organizing material previously spread over many articles it also contains new results The first part provides  
very detailed foundations of a wide ranging theory that could be useful for future developments It includes chapters on  
general intersections of quadrics operations on them and intersections of concentric and coaxial quadrics Moving from the  
general to the specific the second part focuses on a topological description of transverse intersections of concentric ellipsoids  
including a complete description of the case of three ellipsoids and of some large families of more than three of them The  
third part looks at relations to other areas of mathematics such as dynamical systems complex geometry contact and  
symplectic geometry and other applications An appendix gathers some technical items and also gives an account of the  
origins motivations and progression of the subject including historical recollections of the author who has been central to its  
development      **Surgery on Contact 3-Manifolds and Stein Surfaces** Burak Ozbagci,András Stipsicz,2013-03-09 The

groundbreaking results of the near past Donaldson's result on Lefschetz pencils on symplectic manifolds and Giroux's correspondence between contact structures and open book decompositions brought a topological flavor to global symplectic and contact geometry. This topological aspect is strengthened by the existing results of Weinstein and Eliashberg and Gompf in dimension 4 on handle attachment in the symplectic and Stein category and by Giroux's theory of convex surfaces enabling us to perform surgeries on contact 3-manifolds. The main objective of these notes is to provide a self-contained introduction to the theory of surgeries one can perform on contact 3-manifolds and Stein surfaces. We will adopt a very topological point of view based on handlebody theory in particular on Kirby calculus for 3 and 4-dimensional manifolds. Surgery is a constructive method by its very nature. Applying it in an intricate way one can see what can be done. These results are nicely complemented by the results relying on gauge theory, a theory designed to prove that certain things cannot be done. We will freely apply recent results of gauge theory without a detailed introduction to these topics; we will be content with a short introduction to some forms of Seiberg-Witten theory and some discussions regarding Heegaard Floer theory in two

Appendices      **European Conference on Laboratory Astrophysics ECLA2020** Vito Mennella, Christine Joblin, 2023-09-12

This volume contains the proceedings of a conference on laboratory astrophysics which gathered a broad interdisciplinary community of astrophysicists, physicists, chemists, and geophysicists. It provides an update on outstanding results in this research field, the presentation of new laboratory developments, and the recent and expected to come space missions and other astronomical observatories with their specific needs for laboratory and theoretical studies. Understanding the interplay between dust, ice, and gas during the star lifecycle as well as in planet-forming regions and the Solar System is a vast topic in relation with space exploration and astronomical observations. It also strongly relies on laboratory astrophysics activities and chemical modelling in order to simulate the formation and evolution of matter in space. This book provides researchers and graduate students with a valuable account of the current state of this fascinating discipline      **Experiences from Surface**

**Water Quality Monitoring** Antoni Munné, Antoni Ginebreda, Narcís Prat, 2015-12-20 This book details the experiences gained by the Catalan Water Agency ACA in a Mediterranean watershed, the Catalan River Basin District, following the launch of the EU Water Framework Directive (WFD) in the year 2000. Experts in rivers, reservoirs, lakes, wetlands, and estuaries present 13 chapters defining tools for water status assessment specially adapted to Mediterranean conditions. The content of this and the companion volume *Experiences from Ground Coastal and Transitional Water Quality Monitoring* The EU Water Framework Directive Implementation in the Catalan River Basin District Part II are the result of an excellent collaboration between the ACA and several Catalan universities and research centers to cope with new challenges provided by the WFD monitoring requirements. The volume serves as a useful guide for environmental managers and scientists engaged in other European as well as Non-European river basins      Response Surface Methodology Raymond H.
