Real Monasterio De San Lorenzo De El Esc:

Philip II of Spain and the Architecture of Empire Laura Fernández-González, 2021-05-08 Philip II of Spain was a major patron of the arts best known for his magnificent palace and royal mausoleum at the Monastery of San Lorenzo of El Escorial. However, neither the king's monastery nor his collections fully convey the rich artistic landscape of early modern Iberia. In this book, Laura Fernández González examines Philip's architectural and artistic projects, placing them within the wider context of Europe and the transoceanic Iberian dominions. Philip II of Spain and the Architecture of Empire investigates ideas of empire and globalization in the art and architecture of the Iberian world during the sixteenth century, a time when the Spanish Empire was one of the largest in the world. Fernández González illuminates Philip's use of building regulations to construct an imperial city in Madrid and highlights the importance of his transformation of the Simancas fortress into an archive. She analyzes the refashioning of his imperial image upon his ascension to the Portuguese throne and uses the Hall of Battles in El Escorial as a lens through which to understand visual culture, history writing, and Philip's kingly image as it was reflected in the funeral commemorations mourning his death across the Iberian world. Positioning Philip's art and architectural programs within the wider cultural context of politics, legislation, religion, and theoretical trends, Fernández González shows how design and images traveled across the Iberian world and provides a nuanced assessment of Philip's role in influencing them. Original and important, this panoramic work will have a lasting impact on Philip II's artistic legacy. Art historians and scholars of Iberia and sixteenth-century history will especially value Fernández González's research.

Arabic Literary Salons in the Islamic Middle Ages Samer M. Ali, 2010-11-15 Arabic literary salons emerged in ninth-century Iraq and by the tenth were flourishing in Baghdad and other urban centers. In an age before broadcast media and classroom education, salons were the primary source of entertainment and escape for middle and upper-rank members of society, serving also as a space and means for educating the young. Although salons relied on a culture of oral performance from memory, scholars of Arabic literature have focused almost exclusively on the written dimensions of the tradition. That emphasis, argues Samer Ali, has neglected the interplay of oral and written as well as of religious and secular knowledge in salon society and the surprising ways in which these seemingly discrete categories blurred in the lived experience of participants. Looking at the period from 500 to 1250 and using methods from European medieval studies, folklore, and cultural anthropology, Ali interprets Arabic manuscripts in order to answer fundamental questions about literary salons as a social institution. He identifies salons not only as sites for socializing and educating but as loci for performing literature and oral history for creating and transmitting cultural identity and for continually reinterpreting the past. A fascinating recovery of a key element of humanistic culture, Ali's work will encourage a recasting of our understanding of verbal art, cultural memory, and daily life in medieval Arab culture.

Alfonso de Cartagena's "Memoriale virtutum" (1422) María Morrás, Jeremy Lawrance, 2022-06-08 In Alfonso de Cartagena's *Memoriale virtutum* (1422), María Morrás and Jeremy Lawrance offer a critical

edition of an anthology of Aristotle's Nicomachean Ethics compiled and significantly altered by the major Castilian intellectual of the day Bishop Alfonso de Cartagena and addressed to the heir to the throne of Portugal Crown Prince Duarte. The work is a *speculum principis* an education of a future king in the virtues suitable to a statesman. Cartagena's choice of Aristotle was a harbinger of Renaissance ideas. The memorial sheds light on a society in transition setting new ethical guidelines for the ruling class at the crossroads between medieval feudalism and Renaissance absolutism. Portraiture in South Asia since the Mughals Crispin Branfoot, 2018-06-30 One of the most remarkable artistic achievements of the Mughal Empire was the emergence in the early seventeenth century of portraits of identifiable individuals unprecedented in both South Asia and the Islamic world. Appearing at a time of increasing contact between Europe and Asia portraits from the reigns of the great Mughal emperor patrons Akbar, Jahangir and Shah Jahan are among the best known paintings produced in South Asia. In the following centuries portraiture became more widespread in the visual culture of South Asia especially in the rich and varied traditions of painting but also in sculpture and later prints and photography. This collection seeks to understand the intended purpose of a range of portrait traditions in South Asia and how their style setting and representation may have advanced a range of aesthetic social and political functions. The chapters range across a wide historical period exploring ideals of portraiture in Sanskrit and Persian literature the emergence and political symbolism of Mughal portraiture through to the paintings of the Rajput courts sculpture in Tamil temples and the transformation of portraiture in colonial north India and post independence Pakistan. This specially commissioned collection of studies from a strong list of established scholars and rising stars makes a significant contribution to South Asian history art and visual culture. **The Encyclopædia Britannica**, 1893 *The Encyclopaedia Britannica* Thomas Spencer Baynes, 1878 **The Encyclopaedia Britannica**, 1896 Historia de los Protestantes Españoles y de su Persecucion por Felipe II. Philip II promoted within his monastery palace a musical foundation whose dual function as royal chapel and as monastery in the service of a Counter Reformation monarch was unique. The study traces the ways in which music styles and practices responded to the changing functions of the institution. Perceived notions about Spanish royal musical patronage are challenged musical manuscripts are scrutinized biographical details of hundreds of musicians are uncovered and musical practices are examined. Additionally two important choral pieces are printed here for the first time. **Encyclopaedia Britannica**, 1892 **Jousting in Medieval and Renaissance Iberia** Noel Fallows, 2010 Based on close reading of original sources Fallows Spanish U of Georgia offers a detailed reconstruction of the history and practice of jousting detailing techniques and injuries styles of fighting and all the parts of the arms and armor used with frequent citing of original descriptions.
