SB2C Helldiver in Action Robert Stern,1982 *Sb2c Helldiver in Action* David Doyle,2019-08-10 The Curtiss SB2C Helldiver served the U S Navy as a carrier based dive bomber during the last two years of World War II Intended to replace the much smaller Douglas SBD Dauntless and tasked with meeting demanding requirements the Helldiver suffered from numerous difficulties in its development stage An initial prototype crashed less than two months after its first flight and a second prototype crashed two months after it first took to the air Improvements were made however and after 880 modifications demanded by the U S Navy the SB2C entered combat with squadron VB 17 aboard the Bunker Hill during the attack on the Japanese held port of Rabaul north of New Guinea on 11 November 1943 The aircraft was not well liked by air crews however due to its large size heavy weight and lateral instability During the Battle of the Philippine Sea in June 1944 45 Helldivers ran out of fuel and were lost before they could return to their carriers More modifications ensued and the more powerful SB2C 3 made its appearance equipped with the R 2600 20 Twin Cyclone engine and a Curtiss four blade propeller in 1944 Helldivers helped sink the battleship Musashi in October 1944 and in April 1945 sent the battleship Yamato to the bottom of the ocean the two heaviest and most powerfully armed battleships ever built Kamikaze Peter C. Smith,2014-11-28 In this brand new publication from eminent historian Peter C Smith we are regaled with the engaging and often incredibly disturbing history of the Kamikaze tradition in Japanese culture Tracing its history right back to the original Divine Wind major natural typhoons that saved Japan from invaders in ancient history Smith explores the subsequent resurrection of the cult of the warrior in the late nineteenth century He then follows this tradition through into the Second World War describing the many Kamikaze suicide attacks carried out by the Emperor s pilots against Allied naval vessels in the closing stages of the Pacific campaign These pilots were at the mercy of an overriding cultural tradition that demanded death over defeat capture or perceived shame Despite often being under trained and ill prepared psychologically for the sacrifices they were about to make they were nonetheless expected to make them The dedication of sacrifice for the Emperor and the Nation is explored by dissecting the traces left behind by these pilots Smith provides a detailed look at the heartbreak of the pilot s families and the men themselves the notes they left and the effects on those who did not share their philosophy The views of individuals under attack are also included in this balanced history Countless attacks carried out over the Philippine Islands including the sinking of the St Lo are analyzed and the Okinawa campaign is afforded particularly strong coverage with the sinking of HMAS Australia explored in detail The collective sacrifice is then summed up with reflections from survivors on both sides appraising events in a humane historical context A detailed appendices then follows featuring units formed sorties mounted ships sunk and damages inflicted Naval Aviation News ,1998-05 Allied Aircraft Piston Engines of World War II Graham White,1995-09-01 While it took the demands of two World Wars to bring aviation into acceptance by the general public it was a relative handful of engineers entrepreneurs and pilots who positioned

Skua! Peter C. Smith,2007-03-28 The Blackburn Skua was the first monoplane to be designed and built for the Royal Navy in the 1930s As a result of continued debate it became a compromise between the Navys desire for a carrier based dive bomber and RAFs preference for a fighter Despite being the first to shoot down a Luftwaffe aircraft in World War II early operations in Norway found the type woefully inadequate as a fighter As a dive bomber the Royal Navy put the design to good use from the outset of WWII It was involved with the hunt for the Graff Spee sunk the major warship Koln suffered with great loss in an attack on the Scharnhorst helped to keep the German advance at bay during the Dunkirk evacuation and attacked the French rogue battleship Richelieu in the Mediterranean This book relates how the final design was created how the dive bombing technique was developed and perfected by naval pilots and traces the wartime operational career of the type with many first hand accounts

US Navy Carrier Aircraft vs IJN Yamato Class Battleships Mark Stille,2015-09-20 As the Pacific War approached a crescendo the clashes between swarming US Navy carrier aircraft and the gigantic Imperial Japanese Navy IJN Yamato class battleships became symbolic of the fortunes of the two nations They also served as a metaphor for the profound changes in naval technology and doctrine that the war had brought about The two opposing forces were the most powerful of their kind the Japanese Yamato and Musashi were the biggest most heavily armored and armed battleships ever built while US carrier aviation had evolved into a well oiled war winning machine With detailed analysis of the technical features of the opposing war machines and a gripping account of the fighting itself this vividly illustrated work presents views from the cockpits of US Navy Divebombers and down the sights of IJN anti aircraft guns during two of the most dramatic naval engagements ever fought

Combat Biplanes of World War II Peter C. Smith, 2015-09-30 Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in Combat Biplanes of World War II The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still retained some albeit few biplane aircraft Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini s Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond By the time Japan and the United States entered the war two years later they had mainly rid themselves of biplanes but even here a few specialized types lingered on Combat Biplanes of World War II describes many of these gallant old warriors representing the author s own personal selection from a surprisingly large range of aircraft that despite all predictions fought hard and well

Task Force 58 Rod Macdonald, 2023-01-04 The new breed of American fast aircraft carriers could make thirty three knots and each carried almost 100 strike aircraft Brought together as Task Force 58 also known as the Fast Carrier Task Force this awesome armada at times comprised more than 100 ships carrying more than 100 000 men afloat By 1945 more than 1 000 combat aircraft fighters dive and torpedo bombers could be launched in under an hour The fast carriers were a revolution in naval warfare it was a time when naval power moved away from the big guns of the battleship to air power projected at sea Battleships were eventually subordinated to supporting and protecting the fast carriers of which at its peak Task Force 58 had a total of seventeen This book covers the birth of naval aviation the

appearance of the first modern carriers in the 1920s through to the famous surprise six carrier *Kido Butai* Japanese raid against Pearl Harbor on 8 December 1941 and then the early US successes of 1942 at the Battles of the Coral Sea and Midway. The fast carriers allowed America in late 1942 and early 1943 to finally move from bitter defence against the Japanese expansionist onslaught to mounting her own offensive to retake the Pacific. Task Force 58 swept west and north from the Solomon Islands to the Gilbert and Marshall Islands neutralising Truk in Micronesia and Palau in the Caroline islands before the vital Mariana Islands operations, the Battle of Saipan, the first battle of the Philippine Sea and the Great Marianas Turkey Shoot. The strikes by Task Force 58 took Allied forces across the Pacific to the controversial Battle of Leyte Gulf and to Iwo Jima and Okinawa. Task Force 58 had opened the door to the Japanese home islands themselves allowing US bombers to finally get close enough to launch the devastating nuclear bombing raids on Hiroshima and Nagasaki. Task Force 58 participated in virtually all the US Navy's major battles in the Pacific theatre during the last two years of the war. Having spent many years investigating naval shipwrecks across the Pacific, many the result of the devastating effectiveness of Task Force 58, diver and shipwreck author Rod Macdonald has created the most detailed account to date of the fast carrier strike force, the force that brought Japan to its knees and brought the Second World War to its crashing conclusion. *White's*

Aviation, 1945 **The 25 Most Influential Aircraft of All Time** Walter Boyne, Philip Handleman, 2018-03-01 The 25 Most Influential Aircraft of All Time conveys the fascinating progression of flying technology from flimsy wood and fabric biplanes to thunderous supersonic wonders. Aviation's most historically relevant and arguably most influential aircraft, planes like the elliptical-winged Spitfire, the blisteringly fast X-15 and the ubiquitous Learjet are dramatically showcased in individual chapters. Factors like performance, price, operational efficiency and perceptions in popular culture are examined. People are just as important as hardware in the discussion of the world's greatest aircraft. The larger-than-life characters who designed and built these aeronautical marvels, men like the reclusive Howard Hughes and the demanding Clarence Kelly Johnson, are an indispensable part of the story. So too are the fearless pilots like Charles Lindbergh and Chuck Yeager who gave life to the shining examples of a new and dynamic industry. The authors have flown or flown in many of the featured aircraft and they knew many of the luminous personalities involved, enabling them to share unique perspectives. The preface is written by William Lloyd Stearman, a former staff member of the National Security Council and the son of famed industry engineer Lloyd Stearman. The introduction is written by Norman R. Augustine, the retired Chairman and CEO of Lockheed Martin Corporation. The foreword is written by Burt Rutan, the renowned aircraft designer and founder of Scaled Composites. Each aircraft is magnificently illustrated in color, mostly with paintings by leading aviation artists. **U. S. Navy and Marine**
