Standards-setting and United States Competitiveness United States. Congress. House. Committee on Science. Subcommittee on Environment, Technology, and Standards, 2001

Standardization and Digital Enclosure: The Privatization of Standards, Knowledge, and Policy in the Age of Global Information Technology Schoechele, Timothy, 2009-04-30 Establishes a framework of analysis for public policy discussion and debate Discusses topics such as social practices and political economic discourse

Standards and Public Policy Shane Greenstein, Victor Stango, 2006-12-21 Technological standards are a cornerstone of the modern information economy affecting firm strategy market performance and by extension economic growth While there is general agreement that swift movement to superior technological standards is a worthwhile goal there is much less agreement on the central policy questions do markets choose efficient standards How do standards organizations affect the development of standards And finally what constitutes appropriate public policy toward standards In this volume leading researchers in public policy on standards including both academics and industry experts focus on these key questions Given the dearth of applied work on standards and public policy this volume significantly advances the frontier of knowledge in this critical but understudied area It will be essential reading for

academic and industrial researchers as well as policymakers *The Role of Technical Standards in Today's Society and in the Future* United States. Congress. House. Committee on Science. Subcommittee on Technology,2001 Governing the Internet Marcus F. Franda,2001 This volume explores the many complex issues and challenges that confront governments technocrats business people and others as they try to create and implement rules for a truly global interoperable Internet

The Emergent Global Information Policy Regime S. Braman,2004-01-20 There is a struggle over governance of the global information network among national governments and international organizations corporations and NGOs elites and civil society The outcome will determine how we communicate the extent of our civil liberties and human rights the profitability of e commerce and the richness of cultural expression This collection looks at the processes by which the global information policy regime is being formed themselves in conflict as a foundation for understanding its emergent features

The Economics of Information Technology Hal R. Varian,Joseph Farrell,Carl Shapiro,2004-12-23 The Economics of Information Technology is a concise and accessible review of some of the important economic factors affecting information technology industries These industries are characterized by high fixed costs and low marginal costs of production large switching costs for users and strong network effects These factors combine to produce some unique behavior The book consists of two parts In the first part Professor Varian outlines the basic economics of these industries In the second part Professors Farrell and Shapiro describe the impact of these factors on competition policy The clarity of the analysis and exposition makes this an ideal introduction for undergraduate and graduate students in economics business strategy law and related areas *Protocol Politics* Laura Denardis,2009-07-31 What are the global implications of the looming shortage of Internet addresses and the slow deployment of the new IPv6 protocol designed to solve this problem The Internet has reached a critical point The world is running out of Internet addresses There is a finite supply of approximately 4 3 billion Internet Protocol IP addresses the unique binary numbers required for every exchange of information over the Internet within the Internet s prevailing technical architecture IPv4 In the 1990s the Internet standards community selected a new protocol IPv6 that would expand the number of Internet addresses exponentially to 340 undecillion addresses Despite a decade of predictions about imminent global conversion IPv6 adoption has barely begun Protocol Politics examines what s at stake politically economically and technically in the selection and adoption of a new Internet protocol Laura DeNardis s key insight is that protocols are political IPv6 intersects with provocative topics including Internet civil liberties US military objectives globalization institutional power struggles and the promise of global democratic freedoms DeNardis offers recommendations for Internet standards governance based not only on technical concerns but on principles of openness and transparency and examines the global implications of looming Internet address scarcity versus the slow deployment of the new protocol designed to solve this problem Health Care Information Systems Karen A. Wager,Frances W. Lee,John P. Glaser,2013-07-12 This most widely used textbook in the field has been thoroughly revised and updated to reflect changes in

the health care industry and the renewed focus on health care information technology initiatives Two new chapters cover Federal efforts to enhance quality of patient care through the use of health care information technology and strategy considerations Additionally reflecting the increased focus on global health the book features an international perspective on health care information technology Case studies of organizations experiencing management related information system challenges have been updated and several new cases have been added These reality based cases are designed to stimulate discussion among students and enable them to apply concepts in the book to real life scenarios The book's companion Web site features lecture slides a test bank and other materials to enhance students understanding

Building a Virtual Library Hanson, Ardis, Levin, Bruce Lubotsky, 2002-07-01 The organization functioning and the role of libraries in university communities continue to change dramatically While academic research libraries continue to acquire information organize it make it available and preserve it the critical issues for their management teams in the twenty first century are to formulate a clear mission and role for their library particularly as libraries transition to meet the new information needs of their university constituents *Building a Virtual Library* addresses these issues by providing insight into the current changes and developments within the area of library science

All Politics Is Global Daniel W. Drezner, 2008-08-18 Has globalization diluted the power of national governments to regulate their own economies Are international governmental and nongovernmental organizations weakening the hold of nation states on global regulatory agendas Many observers think so But in *All Politics Is Global* Daniel Drezner argues that this view is wrong Despite globalization states especially the great powers still dominate international regulatory regimes and the regulatory goals of states are driven by their domestic interests As Drezner shows state size still matters The great powers the United States and the European Union remain the key players in writing global regulations and their power is due to the size of their internal economic markets If they agree there will be effective global governance If they don't agree governance will be fragmented or ineffective And paradoxically the most powerful sources of great power preferences are the least globalized elements of their economies Testing this revisionist model of global regulatory governance on an unusually wide variety of cases including the Internet finance genetically modified organisms and intellectual property rights Drezner shows why there is such disparity in the strength of international regulations

Geographic Hypermedia Emmanuel Stefanakis, Michael P Peterson, Costas Armenakis, Vasilis Delis, 2007-01-04 This book introduces a new paradigm Geographic Hypermedia which emerges from the convergence of Geographic Information Science and permedia technology Both GI Science and hypermedia have been rapidly evolving fields The initial idea of Geographic Hypermedia was born in 2004 when the editors had been invited to organize a workshop in conjunction with the Hypertext conference organized annually by the Special Interest Group of the Association for Computing Machinery The purpose of the workshop was to examine how hypermedia concepts and tools may be applied in geographical domains The workshop was eventually held in conjunction with the Maps and the Internet Commission of the International

Cartographic Association at the annual meeting of the Association of American Geographers in Denver Colorado in April 2005 The Denver workshop was a successful event bringing together mul disciplinary researchers and professionals in the area of Geographic permedia Researchers from four continents and well recognized insti tions presented their work and exchanged opinions about the new pa digm its content and distinct characteristics from other paradigms Extended versions of the papers presented at the workshop along with some invited chapters from experts in the field led to the compendium of the twenty five chapters in this book volume Geographic Hypermedia is not yet a mature paradigm but we aspire to provide the scientific community with a contemporary view of Geographic Hypermedia present an overview of its progress and current status while also promoting further discussion and research
