Gabor Maté, MD

The Globalization of Addiction Bruce Alexander, 2010-03-04 Addiction is increasing all around the world and the conventional remedies don t work The Globalization of Addiction argues that the cause of this failure to control addiction is that past treatments have focused too single mindedly on the afflicted individual addict This book presents a radical rethink about the nature of addiction Adhd Is Not An Illness And Ritalin Is Not A Cure: A Comprehensive Rebuttal Of The (Alleged) Scientific Consensus Yaakov Ophir, 2022-07-26 Is Attention Deficit Hyperactivity Disorder ADHD the most prevalent neuropsychiatric label in childhood a valid medical condition Should we really refer to the millions of children diagnosed with ADHD as children who suffer from the diabetes of psychiatry a chronic and harmful biological condition that must be treated regularly with powerful psychoactive substances Building on previous critiques this thorough elegant and mainly courageous book answers these questions through a step by step rebuttal of the scientific consensus about ADHD and its first line treatment with stimulant medications While maintaining scientific rigor this book is written in a clear creative and flowing way using colorful examples some funny some tragic which sweep the reader and inspire social change The book integrates key critiques into one consolidated source uncovers massive evidence against the efficacy and safety of stimulant medications and offers principal solutions to this burning socio educational problem But most importantly this book reviews dozens of reliability and validity gaps in the overriding biomedical consensus It exposes multiple biases and non parsimonious bandages unjustified rationalizations aimed at hiding the scientific holes of the consensus and it redefines ADHD as a non pathological quality mode of thought that has both weaknesses and strengths In this way the book serves as the missing needle required to pierce

Working with High-Risk Youth Peter Smyth, 2017-04-11 This book focuses on high risk youth whose struggles include neglect, abuse, alcohol, and drug abuse, the risk of being exploited, mental health issues, and the inability to self-regulate and trust. While practice has traditionally focused on punishment, consequence, and interventions, this book explores the experience and research that shows how youth can be better served with relationship-based practice. Setting out a philosophy and framework for harm reduction, principles of resiliency, and strength-based approaches, community collaboration, and an understanding of early trauma, Smyth provides strategies for engaging and working with the most disconnected, challenging, and troubled youth in society.

We See Things They'll Never See Chantelle Jessica Lewis, Jason Arday, 2025-09-16 How neurotypical hegemony reproduces a culture of exclusion and how to overcome this with love, hope, and solidarity. Ableism is embedded in our daily lives. Social life, education, work, and especially mental health have been organized around rigid ideas of the ideal and the normal citizen, ideas that always exclude neurodiversity. In this pathbreaking book, Chantelle Jessica Lewis and Jason Arday argue that the neurodiversity movement offers ways to mobilize against not only ableism but also other isms, including racism and capitalism. By focusing on the prevalence of neurotypical dominance and power, or neurotypical hegemony, Lewis and Arday show the ways that neurotypical dominance has often been used to justify and normalize some of our more harmful cultures around productivity and value. Throughout the book, Lewis and Arday use theories of Blackness, feminism, class, and neurodivergence to offer a vision of solidarities across differences. They show that race, class, ethnicity, gender, and nation are just some of the social structures for which the politics of neurodiversity can produce an emancipatory analysis. This is a book about applying social theory in practice, taking seriously how academic research and theory can be used outside of academic spaces. With *We See Things They'll Never See*, Lewis and Arday issue a call to action and a call for understanding, acceptance, and humility.

Fighting for Space Travis Lupick, 2018-06-05 North America is in the grips of a drug epidemic with the introduction of fentanyl the chances of a fatal overdose are greater than ever prompting many to rethink the war on drugs Public opinion has slowly begun to turn against prohibition and policy makers are finally beginning to look at addiction as a health issue as opposed to one for the criminal justice system While deaths across the continent continue to climb *Fighting for Space* explains the concept of harm reduction as a crucial component of a city's response to the drug crisis It tells the story of a grassroots group of addicts in Vancouver's Downtown Eastside who waged a political street fight for two decades to transform how the city treats its most marginalized citizens Over the past twenty five years this group of residents from Canada's poorest neighborhood organized themselves in response to the growing number of overdose deaths and demanded that addicts be given the same rights as any other citizen against all odds they eventually won But just as their battle came to an end fentanyl arrived and opioid deaths across North America reached an all time high The genocide in Vancouver finally sparked government action Twenty years later as the same pattern plays out in other cities there is much that advocates for reform can learn from Vancouver's experience *Fighting for Space* tells that story including case studies in Ohio Florida New York California Massachusetts and Washington state with the same passionate fervor as the activists whose tireless work gave dignity to addicts and saved countless lives
