Scent The Mysterious And Essential Powers Of Smell:

Scent Annick Le Gu  rer,1993 *Common Scents* Janice Carlisle,2004-02-19 Who smells Surveying nearly eighty novels written in the 1860s to answer that impolite question *Common Scents* provides a new reading of Victorian values particularly as they assess the relative merits of men and women spirit and matter In depictions of comparative encounters the commonplace meetings of everyday life such fiction often registers the inequalities that distinguish one individual from another by marking one of them with a smell In a surprisingly consistent fashion these references constitute what cultural anthropologists call an osmology a system of differentiations that reveals the status within a particular culture of the persons and things associated with specific odors Featuring often innocuous and even potentially pleasing aromas emanating from food flowers and certain kinds of labor novels of the 1860s array their characters into distinct categories finding in some rather than others olfactory proof of their materiality Central to this osmology is the difference between characters who give off odors and those who do not and this study draws upon the work of Victorian psychophysicists and popular commentators on the senses to establish the subtlety with which fictional representations make that distinction By exploring the far reaching implications of this osmology in specific novels by Dickens Eliot Meredith Oliphant Trollope and Yonge *Common Scents* argues that the strikingly similar plots and characterizations typical of the 1860s responding as they do to the economic and political concerns of the decade reconfigure conventional understandings of the relations between men and women Determining who smells reveals what Victorian culture at its epitome takes for granted as a deeply embedded common sense the recognition of whose self evident truth seems to be as instinctive and automatic as a response to an odor

The Nose Gabrielle Glaser, 2003-09-18 Each year Americans spend billions of dollars on their noses From over the counter sinus remedies to cosmetic surgery aromatherapy to Chanel no 5 we are a nation immersed in all things nasal But how did this one vital organ become an object of beauty a status symbol the basis for judging character What led to the invention of cotton tissues Why do we follow our noses when seeking a mate or choosing a president The Nose is a fascinating tour of its subject through history and biology art and culture sex and sensibility sickness and health Gabrielle Glaser breathes life into her research by offering engaging anecdotes and personal interviews with physicians and their patients members of the FDA and the Fragrance Foundation a rabbi who contemplates the nose in sacred Jewish texts and a plastic surgeon who finally puts his own proboscis under the knife Sure to awaken the senses of anyone who has pondered probed concealed or cosmetically altered their noses this book proves that there's more to the nose than meets the eye

Intercultural Communication James William Neuliep, 2009 This comprehensive user friendly introduction takes a current approach to cultural differences and guides students through the key concepts of

communication and culture **Literature, Belief and Knowledge in Early Modern England** Subha Mukherji, Tim Stuart-Buttle, 2018-05-17 The primary aim of *Knowing Faith* is to uncover the intervention of literary texts and approaches in a wider conversation about religious knowledge why we need it how to get there where to stop and how to recognise it once it has been attained Its relative freedom from specialised disciplinary investments allows a literary lens to bring into focus the relatively elusive strands of thinking about belief knowledge and salvation probing the particulars of affect implicit in the generalities of doctrine The essays in this volume collectively probe the dynamic between literary form religious faith and the process psychology and ethics of knowing in early modern England Addressing both the poetics of theological texts and literary treatments of theological matter they stretch from the Reformation to the early Enlightenment and cover a variety of themes ranging across religious hermeneutics rhetoric and controversy the role of the senses and the entanglement of justice ethics and practical theology The book should appeal to scholars of early modern literature and culture theologians and historians of religion and general readers with a broad interest in Renaissance cultures of knowing Aroma Constance Classen, David Howes, Anthony Synnott, 2002-11-01 Smell is a social phenomenon given particular meanings and values by different cultures Odours form the building blocks of cosmologies class hierarchies and political odours They can enforce social structures or transgress them unite people or divide them empower or disempower The authors argue that the sociology of smell is repressed in the modern West and its social history ignored This book breaks the olfactory silence of modernity It offers the first comprehensive exploration of the cultural role of odours in Western history from antiquity to the present It also covers a wide variety of non Western societies Its topics range from the medieval concept of the odour of sanctity to the aromatherapies of South America and from olfactory stereotypes of gender and ethnicity in the modern West to the role of smell in postmodernity Its subject matter will fascinate anyone who likes to nose around in the inner workings of culture Intercultural Communication James W. Neuliep, 2012 In this fully updated Fifth Edition of *Intercultural Communication* author James W Neuliep provides a clear contextual circular model for examining communication within cultural micro cultural environmental socio relational perceptual contexts and verbal and nonverbal codes The text begins with the broadest context the cultural component of the model and progresses chapter by chapter through each component of the model The later chapters then apply the model to the development and maintenance of intercultural relationships the management of intercultural conflict intercultural management intercultural adaptation culture shock and intercultural competence **World of Aromatherapy** Jeanne Rose, 1996 The voices in this collection are those of leading British and American women active in aromatherapy today They write with verve about the growth of the distillery process and the essential oil industry discuss such technical issues as whether synthetic or natural products are best and describe how they use oils and blends in healing skin care and stress reduction *Imagining Contagion in Early Modern Europe* Claire L. integrated team of literary scholars cultural historians historians of medicine and art historians Even today the spread of disease inspires moralizing discourse and the ostracism of groups thought responsible for contagion the fear of illness and the desire to make sense of it are demonstrated in the current preoccupation with HIV SARS mad cow disease West Nile virus and avian flu to cite but a few contemporary examples *Imagining Contagion in Early Modern Europe* explores the nature of understanding when humanity is faced with threats to its well being if not to its very survival **It Runs in the Family** Ruth A Symes,2013-12-02 In the quest to uncover our family history we turn to written records the family album and even heirlooms However they can often be difficult to interpret and sometimes pose more questions than they answer Why didn't my ancestors smile for the camera Why did great grandfather wear a beard while his sons were clean shaven Why is my great grandmother holding flowers in this photograph Drawing on evidence from social history women's history and the histories of photography art and fashion and using examples from the lowly as well as the famous Ruth Symes explores many aspects of ordinary life in the past from the state of the nation's teeth to the legal and economic connotations of wearing a wedding ring and even the business of keeping a dog This fascinating volume aims to help family historians get to know their elusive ancestors by deciphering the wealth of personal and historical clues contained in photographs documents and artefacts Renegade Beauty Nadine Artemis,2017-11-14 Rethink conventional notions of beauty and wellness abandon established regimes and commercial products and embrace your renegade beauty In this essential full color guide Nadine Artemis introduces readers to the concept of renegade beauty a practice of doing less and allowing the elements and the life force of nature to revive the body skin and soul so our natural radiance can shine through Anyone stuck in perpetual loops of new products facials and dermatologist appointments will find answers as Artemis illuminates the energizing elements of sun fresh air water the earth and plants This book is a comprehensive resource for anyone who wants to simplify their self care routine take their health into their own hands and discover their own radiant beauty **The New Blackwell Companion to The City** Gary Bridge,Sophie Watson,2011-02-23 This book considers the state of the city and contemporary urbanisation from a range of intellectual and international perspectives The most interdisciplinary collection of its kind Provides a contemporary update on urban thinking that builds on well established debates in the field Uses the city to explore economic social cultural environmental and political issues more broadly Includes contributions from non Western perspectives and cities *A Companion to the City* Gary Bridge,Sophie Watson,2002-08-16 A Companion to the City provides the reader with an indispensable and authoritative overview of the key debates controversies and questions concerning the city from a variety of theoretical vantage points with an international perspective Indispensable companion for students of the City Multidisciplinary approach of interest across several fields Includes contributions from major scholars in the field *Elixir* Theresa Levitt,2023-04-25 A story of alchemy in Bohemian Paris where two scientific outcasts discovered a fundamental distinction between natural and synthetic chemicals that inaugurated an enduring scientific mystery For centuries scientists

believed that living matter possessed a special quality a spirit or essence that differentiated it from nonliving matter But by the nineteenth century the scientific consensus was that the building blocks of one were identical to the building blocks of the other Elixir tells the story of two young chemists who were not convinced and how their work rewrote the boundary between life and nonlife In the 1830s douard Laugier and Auguste Laurent were working in Laugier P re et Fils the oldest perfume house in Paris By day they prepared the perfumery s revitalizing elixirs and rejuvenating eaux drawing on alchemical traditions that equated a plant s vitality with its aroma In their spare time they hunted the vital force that promised to reveal the secret to life itself Their ideas roundly condemned by established chemists led to the discovery of structural differences between naturally occurring molecules and their synthetic counterparts even when the molecules were chemically identical Scientists still can t explain this anomaly but it may point to critical insights concerning the origins of life on Earth Rich in sparks and smells brimming with eccentric characters experimental daring and the romance of the Bohemian salon Elixir is a fascinating cultural and scientific history

Driven by Fear Guenter B Risse,2015-12-30 From the late nineteenth century until the 1920s authorities required San Francisco s Pesthouse to segregate the diseased from the rest of the city Although the Pesthouse stood out of sight and largely out of mind it existed at a vital nexus of civic life where issues of medicine race class environment morality and citizenship entwined and played out Guenter B Risse places this forgotten institution within an emotional climate dominated by widespread public dread and disgust In Driven by Fear he analyzes the unique form of stigma generated by San Franciscans Emotional states like xenophobia and racism played a part Yet the phenomenon also included competing medical paradigms and unique economic needs that encouraged authorities to protect the city s reputation as a haven of health restoration As Risse argues public health history requires an understanding of irrational as well as rational motives To that end he delves into the spectrum of emotions that drove extreme measures like segregation and isolation and fed psychological ideological and pragmatic urges to scapegoat and stereotype victims particularly Chinese victims of smallpox leprosy plague and syphilis Filling a significant gap in contemporary scholarship Driven by Fear looks at the past to offer critical lessons for our age of bioterror threats and emerging infectious diseases
