H. Philips,Mary

Doreen Wainwright,2025-06-02 The partition of India in 1947 was an outstanding event in world history It formed a major turning point in the modern history of the sub continent and of the Commonwealth Originally published in 1970 after more than twenty years had passed this title brought together the evidence and put into perspective the course of events which had led to the transfer of power in India from Britain to two successor states rather than to one In 1937 the Muslims in India were thought to be politically weak and disorganized yet ten years later they were able to put forward a convincing claim for a separate state How did this come about The lack of any sense of urgency in making a constitutional settlement between the wars Congress miscalculations during the war and the political exploitation of Muslim nationalism all played a part but the interpretation of the events leading to partition tends to vary with the preconceptions and outlook of the various contributors to the debate at the time The enquiry which led to this volume began as a simple attempt to collect evidence from those still alive From this grew a regular series of meetings between participants and historians of the three countries culminating in a conference The material presented here discusses the more important aspects of the partite from the different viewpoints It

is arranged in two sections first hand accounts by those who took part and an analysis by leading specialists In his Introduction Professor Philips points to the main historical problems which had emerged and suggests areas of study which would repay early investigation The time was not yet ripe for a wholly definitive account but this book suggests a framework within which this could be done and brought together raw material for future historians before the generation of eye witnesses passed away The resources of the School of Oriental and African Studies enabled an enterprise to be mounted which would have been beyond the capacity of any one individual This book is a re issue originally published in 1970 The language used and views portrayed are a reflection of its era and no offence is meant by the Publishers to any reader by this re publication

Delaney,Mark Frost,2021-06-15 In the first and only examination of how the British Empire and Commonwealth sustained its soldiers before during and after both world wars a cast of leading military historians explores how the empire mobilized manpower to recruit workers care for veterans and transform factory workers and farmers into riflemen Raising armies is more than counting people putting them in uniform and assigning them to formations It demands efficient measures for recruitment registration and assignment It requires processes for transforming common people into soldiers and then producing officers staffs and commanders to lead them It necessitates balancing the needs of the armed services with industry and agriculture And often overlooked but illuminated incisively here raising armies relies on medical services for mending wounded soldiers and programs and pensions to look after them when demobilized Manpower and the Armies of the British Empire in the Two World Wars is a transnational look at how the empire did not always get these things right But through trial error analysis and introspection it levied the large armies needed to prosecute both wars Contributors Paul R Bartrop Charles Booth Jean Bou Daniel Byers Kent Fedorowich Jonathan Fennell Meghan Fitzpatrick Richard S Grayson Ian McGibbon Jessica Meyer Emma Newlands Kaushik Roy Roger Sarty Gary Sheffield Ian van der Waag
