Scholar Extraordinary Nirad C. Chaudhuri, 1974 **Scholar Extraordinary** Nirad C. Chaudhuri, 1974 **SCHOLAR EXTRAORDINARY. THE LIFE OF PROFESSOR THE RT. HON. FRIEDRICH MAX MUELLER, P. C. BY NIRAD C. CHAUDHURI.** Nirad C. Chaudhuri, 1974 **Scholar Extraordinary** Nirad C. Chaudhuri, 1996 *Friedrich Max Müller and the Sacred Books of the East* Arie L. Molendijk, 2016-07-28 This volume offers a critical analysis of one of the most ambitious editorial projects of late Victorian Britain: the edition of the fifty substantial volumes of the Sacred Books of the East, 1879-1910. The series was edited and conceptualized by Friedrich Max Müller, 1823-1900, a world-famous German-born philologist, orientalist, and religious scholar. Müller and his influential Oxford colleagues secured financial support from the India Office of the British Empire and from Oxford University Press. Arie L. Molendijk documents how the series has become a landmark in the development of the humanities, especially the study of religion and language in the second half of the nineteenth century. The edition also contributed significantly to the Western perception of the religious or even mystic East, which was textually represented in English translations. The series was a token of the rise of big science and textualized the East by selecting their sacred books and bringing them under the power of western scholarship. **Friedrich Max Müller and the Role of Philology in Victorian Thought** John R. Davis, Angus Nicholls, 2019-05-16 The German comparative philologist Friedrich Max Müller, 1823-1900, was one of the most influential scholars in Victorian Britain. Müller travelled to Britain in 1846 in order to prepare a translation of the Rig Veda. This research visit would turn into a lifelong stay after Müller was appointed as Taylor Professor of Modern Languages at Oxford in 1854. Müller's activities in this position would exert a profound influence on British intellectual life during the second half of the nineteenth century. His book-length essay on Comparative Mythology (1856) inspired evolutionist thinkers such as Herbert Spencer and Edward Burnett Tylor and made philology into one of the master sciences at mid-century. His debates with Charles Darwin and his followers on the origin of language constituted a significant component of religiously informed reactions to Darwin's ideas about human descent. His arguments concerning the interdependence of language and thought influenced fields such as psychology, neurology, paediatrics, and education until the end of the nineteenth century. His theories concerning an Aryan language that purportedly predated Sanskrit and ancient Greek led to controversial debates on the relations between language, religion, and race in the Indian subcontinent and beyond. His monumental 50-volume edition of the Sacred Books of the East helped to lay the foundations for the study of comparative religion. Müller's interlocutors and readers included people as various as Alexander von Humboldt, Darwin, George Eliot, Matthew Arnold, Friedrich Nietzsche, Ferdinand de Saussure, Ernst Cassirer, Mohandas K. Gandhi, and Jawaharlal Nehru. This volume offers the most comprehensive and interdisciplinary assessment of Müller's career to date. Arising from a conference held at the German Historical Institute in London in 2015, it brings together papers by an international group of experts in German studies, German and British history, linguistics, philosophy, English literary studies, and religious studies in

order to examine the many facets of Müller's scholarship This book was originally published as a special issue of the Publications of the English Goethe Society

Hinduism as a Missionary Religion Arvind Sharma, 2012-01-02 Is Hinduism a missionary religion Merely posing this question is a novel and provocative act Popular and scholarly perception both ancient and modern puts Hinduism in the non missionary category In this intriguing book Arvind Sharma re opens the question Examining the historical evidence from the major Hindu eras the Vedic classical medieval and modern periods Sharma's investigation challenges the categories used in current scholarly discourse and finds them inadequate emphasizing the need to distinguish between a missionary religion and a proselytizing one A distinction rarely made it is nevertheless an illuminating and fruitful one that resonates with insights from the comparative study of religion Ultimately concluding that Hinduism is a missionary religion but not a proselytizing one Sharma's work provides us with new insights both on Hinduism and the consideration of religion itself

In Search of Origins Garry Trompf, 2005-01-01 Religion is an integral part of our life The answer to the question what is religion is subjective Since the word religion and its cognates are common coinage across the literate world most of us will have a fair appreciation of the term s connotations Considering students and scholars alike are lacking an introductory textbook on the origins of religion in modern Western theory and archaeological practice this work is designed to fill the lacuna Historians of ideas and social science are often not clear as to how any given theory of religion might pertain to the known archaeological record while exponents of prehistoric religion have worked with surprisingly narrow definitions of religious life Many will locate the kernel of the matter in practice or in an active spirituality Today the pressures of the global village have forced many of us to take off our blinkers and do some cross cultural homework Religious Studies has emerged as an academic discipline or intellectual pursuit with one of its functions being to facilitate mutual understanding between traditions and to ensure that the varieties of religious belief and experience are fairly appraised The series of which this book is a part will be historically rather than theologically oriented This book will cover such a vast area for investigation and it is designed to help students find their own way through the forest pick the trees which interest them and learn how to scrutinise them in depth Religious Studies is a multi disciplinary activity and one is encouraged to turn over as many stones as possible to look at religions from as many different angles as possible the psychological anthropological sociological geographical ecological political economic and the like with some awareness of current theological debates as well This book gives scope to the comparative method and all the great religions are treated side by side with points of comparison and contrast drawn This book begin with the large question of the origins and prehistory of religion including the bearing anthropological study has on this question before giving space to the larger traditions themselves The comparative method is applied not only between such enormous aggregates of phenomena as let us say Buddhism and Islam but between these and small scale tribal traditions as well The book highlights that some religions will be difficult to separate from cultures because they amount to a total way of life An attempt is made to try to interpret religion both as culture and as a distinctive set of forces in interaction with culture or perhaps even against prevailing cultural forms This book has been designed to help students find for themselves possible answers to existential or

theological questions but only as a side effect to historical and phenomenological study and as the author says provide no such answers on a platter
