Shopping for Change Louis Hyman,Joseph Tohill,2017-06-15 Consuming with a conscience is one of the fastest growing forms of political participation worldwide Every day we make decisions about how to spend our money and for the socially conscious these decisions matter Political consumers buy green for the environment or they buy pink to combat breast cancer They boycott Taco Bell to support migrant workers or Burger King to save the rainforest But can we overcome the limitations of consumer identity the conservative pull of consumer choice co optation by corporate marketers and other pitfalls of consumer activism in order to marshal the possibilities of consumer power Can we quite literally shop for change Shopping for Change brings together the historical and contemporary perspectives of academics and activists to show readers what has been possible for consumer activists in the past and what might be possible for today s consumer activists

Unfolding Stakeholder Thinking Jörg Andriof, Sandra Waddock, Bryan Husted, Sandra Sutherland Rahman, 2017-09-08 This book the first of a two volume series argues that today stakeholder thinking has evolved into the study of interactive mutually engaged and responsive relationships that establish the very context of doing modern business and create the groundwork for transparency and accountability This book makes it clear that in today s societies successful companies are those that recognize that they have responsibilities to a range of stakeholders that go beyond mere compliance with the law or meeting the fiduciary responsibility inherent in maximizing returns to shareholders If in the past the focus was on enhancing shareholder value now it is on engaging stakeholders for long term value creation The process of engagement creates a dynamic context of interaction mutual respect dialogue and change not a one sided management of stakeholders Indeed the authors believe the very term stakeholder management to be outdated and corporate centric Companies can manage their relationships with stakeholders but frequently cannot actually manage the stakeholders themselves because as the activist and collaborative initiatives described in this volume suggest company stakeholder relationships are not one way streets and different institutions bring different agendas goals and priorities to the engagement There are clear implications to the way in which stakeholder thinking is unfolding today If in the past corporate social responsibility was simply seen as profitability plus compliance plus philanthropy now responsible corporate citizenship or corporate responsibility means companies being

more aware of and understanding the societies in which they operate Corporate responsibility means recognising that day to day operating practices affect stakeholders and that it is in those impacts where responsibility lies not merely in efforts to do good Companies are now faced with a wide array of challenges that mean that senior executives and managers need to be able to deal with issues including greater accountability human rights abuses sustainability strategies corporate governance codes workplace ethics stakeholder consultation and management Stakeholder thinking needs to capture these new realities The global reach of multinational corporations has served to highlight the need for the re integration of business into society relationships into stakeholder relations and ethics into managerial practice The rise in power of global activism involving NGOs and global business involving multinational corporations makes it even more critical today for companies to consider the power and interests of corporate stakeholders when developing strategic plans The interactivity and mutuality of relationships described in this book make it clear that firms and stakeholders share the power and responsibility to influence both the profit potential of the firm and how the benefits of the firm s success impact on society This important volume brings together leading academic thought on stakeholder thinking for the first time Unfolding Stakeholder Thinking will be indispensable to corporate managers NGOs and academics seeking greater understanding of the dynamics of stakeholder thinking in a world of rapidly changing responsibilities A companion volume Unfolding Stakeholder Thinking 2 focusing on practical issues such as relationship management communication reporting and performance is also available **Is**

The Planetary Bargain Michael Hopkins, 2012-03-29 Corporate scandals and lack of confidence in our largest institutions mean that corporate social responsibility CSR now matters more than ever Encroaching on CSR are concepts such as corporate sustainability and corporate citizenship and older concerns with business ethics business in society and the ethical corporation This significantly revised and updated version of *The Planetary Bargain* explains the relations among these concepts and reflects the author s new ideas and their new context Enterprises across the world are waking up to the need for social responsibility towards shareholders and potential investors managers and other employees customers business partners and contractors or suppliers the natural environment and the communities within which they operate including national governments and non governmental organizations Drawing on case studies of international companies and analysis of research from the past two decades *The Planetary Bargain* shows how corporations can preserve their profitability while treating all stakeholders ethically and responsibly It suggests a cooperative CSR strategy which creates prosperity for corporations and for the people they serve It presents the case for a worldwide agreement or planetary bargain between private and public sectors arguing that it is good for business and essential for future prosperity and stability *Shopping*
