Targeting Maths Judy Tertini,Katy Pike,2004 **Dyslexia in Children** Christopher B. Hayes,2006 Dyslexia is a brain based type of learning disability that specifically impairs a person s ability to read Although the disorder varies from person to person common characteristics among people with dyslexia are difficulty with phonological processing the manipulation of sounds and or rapid visual verbal responding The syndrome of dyslexia does not imply low intelligence or poor educational

potential and is independent of race and social background Although dyslexia seems to be more prevalent among males than females the exact ratio is unknown the most commonly quoted figures are between 3 1 and 5 1 The evidence suggests that in at least two thirds of cases dyslexia has a genetic cause but in some cases birth difficulties may play a role Dyslexia may overlap with related conditions such as dyspraxia attention deficit disorder with or without hyperactivity and dysphasia In childhood its effects can be misattributed to emotional or behavioural disorders By adulthood many dyslexics will have developed sophisticated compensating strategies that may mask their difficulties This new book presents state of the art research in this dynamic field
