## **Nurses Challenge:**

Seeking Challenge in the Career S. Gayle Baugh, Sherry E. Sullivan, 2018-06-01 The Research in Careers series is designed in five volumes to provide scholars a unique forum to examine careers issues in today's changing global workplace. What makes this series unique is that the volumes are connected by the use of Mainiero and Sullivan's 2006 Kaleidoscope Career Model KCM as the organizing framework and the theme underlying the volumes. In Volume 4 of the Research in Careers series, the authors explore the influence of challenge on career development and career outcomes. The contributors investigate career challenge in different national contexts (e.g., India) and in different career fields (e.g., entrepreneurship, nursing) and for different groups of nurses (Millennials). The outcomes studied include career satisfaction, leadership skills, and occupational expertise. Finally, negative effects of challenge are suggested.

Nursing, Physician Control, and the Medical Monopoly Thetis M. Group, Joan I. Roberts, 2001-10-03 Nursing Physician Control and the Medical Monopoly Historical Perspectives on Gendered Inequality in Roles Rights and Range of Practice Thetis M Group and Joan I Roberts A history of physicians efforts to dominate the healthcare system Nursing Physician Control and the Medical Monopoly traces the efforts by physicians over time to achieve a monopoly in healthcare often by subordinating nurses their only genuine competitors Attempts by nurses to reform many aspects of healthcare have been repeatedly opposed by physicians whose primary interest has been to achieve total control of the healthcare system often to the detriment of patients health and safety Thetis M Group and Joan I Roberts first review the activities of early women healers and nurses and examine nurse physician relations from the early 1900s on The sexist domination of nursing by medicine was neither haphazard nor accidental but a structured and institutionalized phenomenon Efforts by nurses to achieve greater autonomy were often blocked by hospital administrators and organized medicine The consolidation of the medical monopoly during the 1920s and 1930s along with the waning of feminism led to the concretization of stereotyped gender roles in nursing and medicine The growing unease in nurse physician relations escalated from the 1940s to the 1960s the growth and complexity of the healthcare industry expanding scientific knowledge and increasing specialization by physicians all created heavy demands on nurses Conflict between organized medicine and nursing entered a public open phase in the late 1960s and 1970s when medicine unilaterally created the physician s assistant countered by nursing s development of the advanced nurse practitioner But gender stereotypes remained central to nurse physician relations in the 1980s and into the 1990s Finally Group and Roberts examine the results of the medical monopoly from the impact on patients health and safety to the development of HMOs and the current overpriced poorly coordinated and fragmented healthcare system Thetis M Group is Professor Emerita at Syracuse University where she was Dean of the College of Nursing for 10 years and an adjunct faculty member at the University of Utah College of Nursing She is co author of *Feminism and Nursing* and has published numerous articles in professional nursing journals Joan I Roberts social psychologist is Professor Emerita at Syracuse University A pioneer in
