astronomy and cosmology have proved themselves to possess intrinsic beauty and to have enormous explanatory and predictive power This anthology of primary readings chronicles the birth and maturation of five such theories the heliocentric theory the electromagnetic field theory special and general relativity quantum theory and the big bang theory in the words of the scientists who brought them to life It is the first historical account that captures the rich substance of these theories each of which represents a fascinating story of the interplay of evidence and insight and of dialogue among great minds Readers sit in with Copernicus Kepler and Galileo as they overturn the geocentric universe observe the genius of Faraday and Maxwell as they discover the electromagnetic field look over Einstein's shoulder as he works out the details of relativity listen in as Einstein and Bohr argue for the soul of quantum mechanics in the Completeness Debate and watch as Hubble and others reveal the history of the universe The editors approach highlights the moments of discovery that rise from scientific creativity and the presentation humanizes the scientific process revealing the extent to which great scientists were the first to consider the philosophical implications of their work But most significantly the editors offer this as their central thesis although each was ushered in by a revolution and each contains counterintuitive elements that delayed its acceptance these five theories exhibit a continuous rational development that has led them to a permanent place in the worldview of science Accessible to the general reader yet sufficiently substantive that working scientists will find value in it The Tests of Time offers an intimate look into how physical theory has been developed by the brilliant people who have developed it

**Reading for Pleasure** Kenny Pieper, 2016-12-01 In Reading for Pleasure Kenny Pieper has gathered a range of tried and tested strategies to get kids reading and enjoying it We hear too often that kids don't read any more Kenny thinks it should be every teacher's mission to prove this isn't true In a squeezed curriculum it can be tempting to accept pupils lack of reading and make excuses that there is not enough time to give to the luxury of personal reading Teachers do this at our peril Reading is the essential building block of further literacy development as well as a skill hobby and habit that we can take with us forever Kenny Pieper takes the act of reading for granted as many but sadly not all adults do You're reading this right now However

this isn't the case for everyone Kenny teaches kids whose lives are terrifying obstacle courses of reading related problems They know they struggle with reading so they try to avoid reading at all costs They leave school not merely unaffected by this strange reading thing but saddled with a great deal of emotional baggage about being an outsider even more entrenched in a belief that reading is for others more intelligent than them Then there are the children who can read perfectly well but chose not to unconvinced of the importance of reading in their lives What difference does it make to them We have to answer that question in school We have a duty to put an end to illiteracy and aliteracy Kids need reading role models and as a teacher that role model is you You may be the only adult who that reluctant reader will ever see reading Teachers are critical in giving all children the gift of being able to read well and to value reading Topics covered include the author's personal reading journey how reading enabled him to become the first person in his family to go to university and convinced him that fostering a love of reading is his moral duty as an educator illiteracy and aliteracy reluctant readers book reviews prioritising personal reading by devoting ten minutes each lesson to it habitual reading the reading environment interest inventories technology e readers Accelerated Reader programmes recommended reading building a class library bookmarks book tweets book speed dating libraries librarians literacy and class inequality parental involvement podcasting reading records reading dialogue journals the rights of the reader reading aloud silent reading and literacy and gender amongst others The benefits we can all reap when kids become confident readers who read for pleasure are obvious Discover strategies which will get kids talking about books get them thinking about books get them reading books encourage independent reading develop literacy skills and establish a classroom culture where reading is expected and celebrated Suitable for primary and secondary teachers leaders and SENCOs or just anyone with an interest in or responsibility for getting kids to read **Second**

**Language Anxiety** Richard L. Sparks, 2025-07-11 This book traces and summarizes theoretical insights and empirical findings on the topic of whether or not anxiety for language learning could be a causal variable for individual differences in language learning The author brings together three decades of research to show that first language L1 skills and second language L2 aptitude are confounding variables in studies of language anxiety and that learners levels of anxiety for L2 learning are strongly related to their levels of language achievement These findings have suggested that language anxiety instruments reflect students accurate self perceptions of their language skills and their levels of L1 achievement and L2 aptitude The research presented in this book holds the potential to change the ways in which L2 educators and researchers think about language anxiety how language anxiety is assessed how investigations into language anxiety are conducted and how L2 teachers respond to anxiety in the classroom *Close Reading of Informational Sources* Sunday

Cummins, 2019-05-14 Given the number of well developed informational sources available to educators and students and the focus of departments of education on learning from these sources there is so much potential for students to grow as critical consumers of information Being able to read informational sources closely or watch and listen to sources carefully across all

content areas creates a path for being able to understand the world better More than ever before close reading has become an essential approach with students and the informational sources they are attempting to understand In addition to addressing instruction with traditional printed texts I address how to teach for understanding of content in videos and infographics I have also developed a three phase plan for learning and a matching template for lesson planning
