Understanding and Teaching Reading Emerald Dechant, 2013-09-13 In the words of Aldous Huxley Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of reading in fact most extol its virtues As our culture becomes more complex reading plays an increasingly greater role in satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension thus this text is about these basic processes and their integration A common plea from teachers today is that research and psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and discuss those bits of data research and theory that are most relevant to the teacher s understanding of the reading process and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching

Trends and Prospects in Metacognition Research Anastasia Efklides, Plousia Misailidi, 2010-09-08 Trends and Prospects in Metacognition presents a collection of chapters dealing principally with independent areas of empirical Metacognition research These research foci such as animal metacognition neuropsychology of metacognition implicit learning metacognitive experiences metamemory young children s Metacognition theory of mind metacognitive knowledge decision making and interventions for the enhancement of metacognition have all emerged as trends in the field of metacognition Yet the resulting research has not converged precluding an integration of concepts and findings Presenting a new theoretical framework Trends and Prospects in Metacognition extends the classical definitions offered by Flavell and Nelson to carry the

prospect of more integrated work into the future By opening the possibility to cross the boundaries posed by traditionally independent research areas this volume provides a foundation for the integration of research paradigms and concepts and builds on the relationship between metacognition and consciousness while integrating basic with applied research
