As envisaged by Robert A LeVine many years ago the human development indicators have improved in many societies as income healthcare and educational opportunities have been enlarged Global transformations have led to significant decline in extreme poverty and an increase in working class and middle class families around the world in the emerging economies throughout Africa and Asia As the technological and global influences continue to challenge the dominant narrative in academic psychology conflated with WEIRD data assumptions interdisciplinary research will continue to increase in value and scope where LeVine s classical approach in psychological anthropology combined with psychoanalysis developmental psychology demography language or area research and population studies offers a path forward The essays collected here in addition to honoring LeVine s work hold out the promise of a real convergence between psychology and anthropology or the development of a psychosocial science a confluence between positivism and relativism empiricism and ethnography and social sciences and human sciences The scientific search for universal laws and the ever expanding search for cultural meanings in the diverse communities around the world must continue simultaneously and in conjunction with the transnational or global challenges we face today Hybridity fostered by interdisciplinary researchers has stood the test of time as the social sciences have gradually outgrown the monolithic ways of looking at the world The project of a psychosocial science represented by the work of Robert A LeVine at the intersection of psychology anthropology demography child development and psychoanalysis maps out some of the challenges of a hybrid discipline Hybridity impacts not only the humanities and social sciences but physical sciences in genetics and genomics or applied disciplines like biotechnology and

life sciences Thus it is important that we not lose sight of LeVine s spirit of interdisciplinary research Advocates for universalism the psychologists or behavioral scientists pursuing universal laws of human nature must collaborate with the growing number of relativistic scientists anthropologists sociologists or cultural studies experts searching for local meanings in small scale village communities There will be a confluence of social and human sciences or what C P Snow the English literary critic called the two cultures of the scientific revolution the sciences and humanities Praise for *The Cultural Psyche* This edited collection by Dinesh Sharma of his mentor Robert LeVine s papers is uniquely positioned between psychology anthropology and human development As one surveys its wide ranging and fascinating papers one not only comes to understand the principal lines of work carried out over a half century by a remarkable scholar At the same time one gains a sense of the history of these lines of work by a person who has lived through it reflected on it and contributed significantly to its advances This exceptionally valuable volume not only surveys child and human development in depth and across cultures it also points out ways in which these lines of work ought to be pursued in the years to come Howard E Gardner Hobbs Professor of Cognition and Human Development Harvard University Cambridge MA This book offers an overview of the wide ranging contributions of one of the giants of thinking about human development parenting and culture of the last 50 years By bringing together a large body of Bob s writings some of them entirely new this volume represents only one important dimension of LeVine s enormous influence on the thinking of today s scholars but in addition it should be noted how much his scholarship has shaped the work and the thinking of his many students and collaborators in ways that will persist through several academic generations Catherine E Snow Patricia Albjerg Graham Professor of Education Harvard University Cambridge MA
