## **Real Magic:**

**Here Is Real Magic** Nate Staniforth, 2018-01-16 An extraordinary memoir about finding wonder in everyday life from magician Nate Staniforth. Nate Staniforth has spent most of his life and all of his professional career trying to understand wonder: what it is, where to find it, and how to share it with others. He became a magician because he learned at a young age that magic tricks don't have to be frivolous. Magic doesn't have to be about sequins and smoke machines; rather, it can create a moment of genuine astonishment. But after years on the road as a professional magician crisscrossing the country and performing four or five nights a week every week, Nate was disillusioned, burned out, and ready to quit. Instead, he went to India in search of magic. *Here Is Real Magic* follows Nate Staniforth's evolution from an obsessed young magician to a broken wanderer and back again. It tells the story of his rediscovery of astonishment and the importance of wonder in everyday life during his trip to the slums of India, where he infiltrated a three thousand year old clan of street magicians. *Here Is Real Magic* is a call to all of us to welcome awe back into our lives, to marvel in the everyday, and to seek magic all around us.

**Real Magic** Dean Radin, PhD, 2018-04-10 The chief scientist at the Institute of Noetic Sciences (IONS) turns a critical eye toward such practices as telepathy, clairvoyance, precognition, and psychokinesis. Are such powers really possible? Science says yes. According to noted scientist and bestselling author of *The Conscious Universe*, Dean Radin, magic is a natural aspect of reality, and each of us can tap into this power with diligent practice. But wait—aren't things like ESP and telepathy just wishful thinking and flights of the imagination? Not according to the author, who worked on the US government's top secret psychic espionage program known as Stargate. Radin has spent the last forty years conducting controlled experiments that demonstrate that thoughts are things that we can sense; others' emotions and intentions from a distance; that intuition is more powerful than we thought; and that we can tap into the power of intention. Think *The Secret* only on a more realistic and scientific level. These dormant powers can help us to lead more interesting and fulfilling lives. Beginning with a brief history of magic over the centuries, what was called magic two thousand years ago is turning out to be scientific fact today. A review of the scientific evidence for magic, a series of simple but effective magical techniques: the key is mental focus. Something elite athletes know. A lot about Radin, then, offers a vision of a scientifically informed magic and explains why magic will play a key role in frontiers of science.

**Summary of Real Magic by Dean Radin** Alden Marshall, A concise and professionally researched summary of Dean Radin's book *Real Magic*. From Alden Marshall's Condensed Esoterica series, this complete summary provides a fast and straightforward way to understand and study the main ideas and concepts of the original source text. About the Original Book: *Real Magic* by Dean Radin provides fascinating insights into the modern perspective of magic and how it relates to science. Radin uses practical terminology and his real experiences in laboratories to illustrate his points. These can be replicated and verified to demonstrate how real magic shapes the world we live in. **Butterhead's Dream** Karen Cother Boyle, 2010-07-30 What if you were a young child who has all of a sudden come up against some pretty painful events in your life What if you were a simple young animal who lived an uncomplicated innocent life How would you feel when your world became scary or hurtful Ginny is an eleven year old little human girl She's had some deep losses recently and doesn't know what to do or where to turn Butterhead is an orange half grown kitten who lives in the area and has no memories of life being anything else than it presently seems to be Then one day a day greatly unlike the others he's known this tiny child is greatly and rudely awakened to something quite out of his understanding and the anxiety of being alone Think a little bit about coming back way back into the mysterious aura of the Southland in 1950 Muddy fishy scents from the river will invade your senses as true magic and true mystery are finally revealed for what they really are

*Consecrating Science* Lisa H. Sideris, 2017-08-15 In *Consecrating Science* Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster

environmental attitudes and policies that protect our planet Provided by publishe
