Sarah Churchwell, Thomas Ruys Smith, 2012-08-02 What is it about certain books that makes them bestsellers Why do some of these books remain popular for centuries and others fade gently into obscurity And why is it that when scholars do turn their attention to bestsellers they seem only to be interested in the same handful of blockbusters when so many books that were once immensely popular remain under examined Addressing those and other equally pressing questions about popular

literature Must Read is the first scholarly collection to offer both a survey of the evolution of American bestsellers as well as critical readings of some of the key texts that have shaped the American imagination since the nation's founding. Focusing on a mix of enduring and forgotten bestsellers, the essays in this collection consider 18th and 19th century works like *Charlotte Temple* or *Ben Hur* that were once considered epochal but are now virtually ignored, 20th century favorites such as *The Sheik* and *Peyton Place* and 21st century blockbusters including the novels of Nicholas Sparks *The Kite Runner* and *The Da Vinci Code*.

**The Da Vinci Codebreaker** James L. Garlow, 2006-04-01 A Valuable Guide to the Errors and Omissions in the Blockbuster Novel and Film *The Da Vinci Codebreaker* provides answers to the questions readers most often ask about the popular novel. Included are more than 400 terms, people, locations, events, and definitions, including explanations that are historically and theologically correct, all arranged in an easy-to-use dictionary style. **Relativism, Alternate History, and the Forgetful Reader** Derek Thiess, 2014-11-25 The writer of alternate history asks, what if? What if one historical event were different, what would the world look like today? In a similar way, the postmodern philosopher of history suggests that history is literature or that if we read certain historical details differently, we would get a distinctly different interpretation of past events. While the science-fiction alternate history means to illuminate the past to increase our understanding of past events, however, the postmodern approach to history typically suggests that such understanding is impossible. To the postmodern philosopher, history is like literature in that it does not offer the reader access to the past but only an interesting story. Building on criticism that suggests personal psychological reasons for this obscuring the past and using a literary theory of readership, this book challenges the postmodern approach to history. It channels the speculative power of science fiction to read the works of postmodern philosophy of history as alternate histories themselves and to map the limits and pathology of their forgetful reading of the past.

**Why the Middle Ages Matter** Celia Chazelle, Simon Doubleday, Felice Lifshitz, Amy G. Remensnyder, 2012-02-20 The word medieval is often used in a negative way when talking about contemporary issues. *Why the Middle Ages Matter* refreshes our thinking about this historical era and our own by looking at some pressing concerns from today's world, asking how these issues were really handled in the medieval period and showing why the past matters now. The contributors here cover topics such as torture, animal rights, marriage, sexuality, imprisonment, refugees, poverty, and end-of-life care. They shed light on relations between Christians and Muslims and on political leadership. This collection challenges many negative stereotypes of medieval people, revealing a world from which, for instance, much could be learned about looking after the spiritual needs of the dying and about integrating prisoners into the wider community with the emphasis on reconciliation between victim and criminal. It represents a new level of engagement with issues of social justice by medievalists and provides a highly engaging way into studying the middle ages for students.

**Fuzzy Language in Literature and Translation** Lu SHAO, 2023-06-16 Bringing a fuzzy logic-based approach into translation studies and drawing

on the theory of information entropy this book discusses the translation of fuzzy language in literary works and advances a new method of measuring text fuzziness between translation and source text Based on illustrative examples from the popular novel *The Da Vinci Code* and its two translated Chinese versions the study demonstrates the fuzziness measuring method through an algorithmic process More specifically information entropy is applied to measure the uncertainty associated with readers understanding of the original and its corresponding target texts The underlying hypothesis is that the probability distribution in which readers will understand identified fuzzy discourse is measurable By further explicating the validity of the hypothesis it seeks to solve translational fuzzy problems in the translation process and offers an alternative novel approach to the study of fuzzy literary texts and their translation Hopefully the argument of the book that the intrinsic uncertainty of fuzzy language can be evaluated through Shannon s information entropy will open up a new avenue to the quantitative description of the fuzziness of language and translation This book will be of interest to scholars and students in translation studies applied linguistics and literary criticism
