Say What You Mean One 1 The Sentence:

After Cognitivism Karl Leidlmair, 2009-09-01 There is a basic perplexity in our times On the one hand we find a blind trust in technology and rationalism In our neo liberalistically dominated world only what can be rapidly exploited and commercialized seems to count The only opposing reaction to this kind of rationalism is an extreme rejection of all kinds of reasoning and sometimes attendant religious fundamentalism But instead of reflecting on the limits and possibilities of reasoning dialogue is replaced by a demagogic struggle between cultures One cause of the blind trust in technology is misunderstandings about the significance and the application of theories in the reception of the so called Enlightenment The Enlightenment is essentially characterized by two forces i the conception of society as a social contract and ii the new science New nian physics etc But as a result we lost ground Atomistic individualism nourished the illusion of a self contained ego prior to man's entering into a shared intersubjective world And in the new science our constructions of reality became autonomous and independent of our interventions Thus we became caught in the inherent dynamism of our computational constructions of reality Science as it is applied today operates with far too simple parameters and model theoretic constructions erroneously taking the latter the models as literal descriptions of reality *The Voice...* Oneil
