Beyond the Symbol Model John Stewart, 1996-10-17 *Beyond the Symbol Model* Reflections on the Representational Nature of Language presents arguments on several sides of the contemporary debate over the representational nature of language Contributors include philosophers linguists psychologists semioticians and communication theorists from the U S Canada Britain Northern Ireland and Israel The chapters respond to the argument that language can no longer be viewed as a system of signs or symbols and that a post semiotic account can be developed from the recognition that language is first and foremost constitutive articulate contact Three chapters extend this argument two frame it historically three disagree and one contextualizes the beyond enterprise itself The book is a companion volume to *Language as Articulate Contact Toward a Post Semiotic Philosophy of Communication* These two books contribute to the ongoing conversation about the nature of language that is strongly influencing theory and research in virtually all the human studies [Collected Essays 1929 - 1968](#)

Language, Cognition, and the Way We Think Nikola A. Kompa, 2024-07-25 The cognitive potency of the human mind can be fully appreciated only if it is conceived of as a linguistic mind This is the starting point of Nikola Kompa's investigation into the relationship between language and cognition Underpinned by philosophical ideas from Plato to Ockham and from Locke to Vygotsky Kompa uses theories within the philosophy of language mind and cognitive science and draws on neuro psychology and psycholinguistic studies to explore core ideas about language and cognition How did language transform our ancestors into creatures of considerable cognitive and social accomplishment How does language augment cognition Is language only a means of communicating our ideas or is a means of thinking itself Her study has repercussions for a broad range of questions from how humans differ from other animals and what a cognitive architecture looks like if it approximates the achievements of the human mind to questions of education and cross cultural communication Theorizing and forming hypotheses about how language and cognition might have coevolved how the availability of symbolic labels enhance various cognitive functions what the cognitive function of inner speech might be and how inner speech and thought relate to each other Kompa addresses the perennial philosophical question of what the benefits of having a language might be and brings into sharper relief the intimate connection between linguistic and other cognitive functions Informed by recent discussions on language evolution labels and inner speech this timely contribution helps us understand more about how language changes the way we think **Curriculum Review**, 1981

Original Knowing J. Bradley Wigger, 2012-10-17 Did Lucy know God Could Neanderthals talk Was Ardi self conscious These are the strange new breed of questions emerging as we discover more and more about our prehistoric origins questions about knowing While fossil digs and carbon dating tell a remarkable story about the bones and times of our ancient ancestors we cannot help wondering what they knew and when Exploring such questions *Original Knowing* takes contemporary science as seriously as religious tradition and searches for the story behind this odd creature who senses more to the universe than meets the eye In limestone bluffs and butterfly migrations from Stone Age tool making to Sumerian beer making clues are sought to better understand this strange mind that ponders the origins of its own existence When do babies point and why does it matter What does throwing a Frisbee reveal about our distant ancestors Is language the key to our minds as many believe Or perhaps the heart of knowing rests in something more basic in a smile and the powerful social abilities at work allowing us to sense a depth to life to our own lives a depth that our minds help us glimpse if only through a glass darkly
