Persson,2012-12-06 The first

years of the 90s have witnessed thorough political and economic changes in northern Europe The long period of strong political separation between east and west and the less strong economic separation between the northern and southern sides of the Baltic Sea seemed to be replaced by far reaching integration There is no doubt that further integration will have additional impacts on the regional patterns in northern Europe The amplitude and composition of these changes are difficult to project In this volume a number of scholars in regional science and related disciplines geography economics environmental and political sciences planning have brought together important material on the current processes that reshapes northern Europe Visions and strategies on local national and supranational levels are penetrated in depth A mosaic vision of the regional development pattern emerges highlighting the importance of cooperative and competitive strategies affecting the local conditions of European regions      **Bordering the Baltic** Madeleine Hurd,2010 In this book scholars from different disciplines use case studies drawn from Sweden Norway Finland and Denmark to analyze the last century s construction of engagement with and challenges to both hard and soft Scandinavian boundaries The book provide historical examples of how national borders have been contested by Scandinavian states caught between powerful Continental neighbors these attempts to firm up boundaries can be contrasted to the denationalization of borders caused both by the globalization of communications and markets and by political efforts to submerge national boundaries in a common Baltic identity A second set of studies focuses on boundaries defining Scandinavian minorities Here the book analyzes the spaces

rituals bodies gender roles and collective identity discourses implicit in majority minority boundaries and their transgression Throughout Scandinavian bordering processes are studied in terms of the groups that launch them the methods by which they are propagated and finally the meanings supposedly and actually invested in them Series Nordische Geschichte Vol 10
