theMystery.doc Matthew McIntosh, 2017-10-03 A vast beguiling postmodern novel of ideas misread intentions and robots told in words pictures symbols and even blank pages by the author of *Well Kirkus* Rooted in the western United States in the decade after 9 11 Matthew McIntosh's epic and elliptical novel follows a young writer and his wife as he attempts to write the follow up to his first novel He desperately searches for a form that will express the world as it has become even as it continually shifts all around him Pop up ads search results web chats snippets of conversation lines of code and film and television stills mix with alchemical manuscripts classical works of literature and the story of a man who wakes up one morning having lost his memory His only clue to his own identity is a single blank document on his computer called theMystery.doc From text messages to *The Divine Comedy* first love to artificial intelligence the book explores what makes us human the stories we tell the memories we hold on to the memories we lose and the relationships that give our lives meaning Part love story part memoir part documentary part existential whodunit theMystery.doc is a modern epic about the quest to find something lasting in a world where everything and everyone is in danger of slipping away McIntosh is a slacker Proust writing about the underclass of Spokane rather than the upper classes of Paris as he attempts to convert memories and experience into art a remarkable achievement Steven Moore *Washington Post* A to Zoo Carolyn W. Lima, John A. Lima, 2006 Presents a guide to nearly 27 000 children's picture book titles grouped in over 1 200 subjects and indexed by author title and illustrator **Man the Hunted** Donna Hart, 2018-04-17 *Man the Hunted* argues that primates including the earliest members of the human family have evolved as the prey of any number of predators including wild cats and dogs hyenas snakes crocodiles and even birds The authors studies of predators on monkeys and apes are supplemented here with the observations of naturalists in the field and revealing interpretations of the fossil record Eyewitness accounts of the man the hunted drama being played out even now give vivid evidence of its prehistoric significance This provocative view of human evolution suggests that countless adaptations that have allowed our species to survive from larger brains to speech stem from a considerably more vulnerable position on the food chain than we might like to imagine The myth of early humans as fearless hunters dominating the earth obscures our origins as just one of many species that had to be cautious depend on
