behaviour advice literature was also a conduit for changing views of mass readers and of their place in society This important and engaging book is the first systematic exploration of this hitherto neglected genre of popular printed text It examines the evolution of advice literature from the Enlightenment to the post Soviet era from translations of F nelon and Madame de Lambert in the 1760s and of Samuel Smiles in the late nineteenth and early twentieth centuries to tracts by Gogol and Tolstoi Soviet pamphlets on how to be cultured and post Soviet guides to window treatments It draws on a huge range of sources memoirs novelised conduct books such as Anna Karenina parody advice literature letters and reviews to examine the broader significance of how to books and their relationship with daily life byt as construct and as lived reality The result is a book that not only makes a major contribution to the study of popular culture but also throws an unexpected and revealing light on Russian history more broadly

Alternative Capitalisms Robert Gwynne, Denis Shaw, Thomas Klak, 2014-05-12 This book aims to examine the effects of globalization and economic and political transformations in those parts of the world which are now regularly referred to as emerging regions These are Latin America and the Caribbean East Central Europe and the former Soviet Union and East Asia This book breaks new ground in three areas First of all it develops a critique of the use of the term emerging regions for geographers and social scientists and relates this to world systems theory Secondly it explores the development trajectories and challenges of countries in this so called emerging world countries that will be crucial to the evolution of the world economy in the twenty first century Thirdly it compares and contrasts the pathways of both economic and political change in the three world regions under focus This is a unique approach in terms of books published in both geography and the social sciences Within the context of the three world regions the book combines historical and contemporary analysis of the evolving world system In these regions we are concerned to understand the historical expansion and extension of capitalism and how its contemporary forms of production exchange and regulation are evolving The authors believe that at the present time these processes have produced alternative capitalisms economic and associated developments which while assuredly capitalist differ in various ways from those typical of the capitalist West or core economies of North America and Western Europe
