Schizophrenia, Culture, and Subjectivity Janis Hunter Jenkins, Robert John Barrett, 2003-11-17 Based on international research this collection incorporates a critical analysis of World Health Organization cross cultural findings Contributors share an interest in subjective and interpretive aspects of illness while maintaining the concept of schizophrenia that addresses its biological aspects The volume is of interest to scholars in the social and human sciences and of practical relevance not only to psychiatrists but all mental health professionals encountering the clinical problems bridging culture and psychosis

Schizophrenia, Culture, and Subjectivity Robert J. Barrett, 2004

Re-Visioning Psychiatry Laurence J. Kirmayer, Robert Lemelson, Constance A. Cummings, 2015-07-29 Re Visioning Psychiatry explores new theories and models from cultural psychiatry and psychology philosophy neuroscience and anthropology that clarify how mental health problems emerge in specific contexts and points toward future integration of these perspectives Taken together the contributions point to the need for fundamental shifts in psychiatric theory and practice Restoring phenomenology to its rightful place in research and practice Advancing the social and cultural neuroscience of brain person environment systems over time and across social contexts Understanding how self awareness interpersonal interactions and larger social processes give rise to vicious circles that constitute mental health problems Locating efforts to help and heal within the local and global social economic and political contexts that influence how we frame problems and imagine solutions In advancing ecosystemic models of mental disorders contributors challenge reductionistic models and culture bound perspectives and highlight possibilities for a more transdisciplinary integrated approach to research mental health policy and clinical practice

Experiencing Psychosis Jim Geekie, Patte Randal, Debra Lampshire, John Read, 2013-03 Extensive scientific research has been conducted into understanding and learning more about psychotic experiences However in existing research the voice of subjective experience is rarely taken into consideration In this book first person accounts are brought centre stage and examined alongside current research to suggest how personal experience can contribute to professional understanding and therefore the treatment of psychosis Experiencing Psychosis brings together a range of contributors who have either experienced psychosis on a personal level or conducted research into the topic Chapters are presented in pairs providing information from both personal and research perspectives on specific aspects of psychosis including hearing voices delusional beliefs and trauma as well as cultural existential and spiritual issues Experts from the field recognise that first and foremost psychosis is a human experience and that those who suffer from psychotic episodes must have some involvement in any genuine attempts to make sense of the experience This book will be essential reading for all mental health professionals involved with psychosis The accessible style and compelling personal histories will also attract service users and their families

Embodiment, Enaction, and Culture Christoph Durt, Thomas Fuchs, Christian Tewes, 2023-09-19 The first interdisciplinary investigation of the cultural context of enactive embodiment offering perspectives that range from the neurophilosophical to the anthropological Recent accounts of cognition attempt to overcome the limitations of traditional cognitive science by reconceiving cognition as enactive and the cognizer as an embodied being who is embedded in biological psychological and cultural contexts Cultural forms of sense making constitute the shared world which in turn is the origin and place of cognition This volume is the first interdisciplinary collection on the

cultural context of embodiment offering perspectives that range from the neurophilosophical to the anthropological The book brings together new contributions by some of the most renowned scholars in the field and the latest results from up and coming researchers The contributors explore conceptual foundations drawing on work by Husserl Merleau Ponty and Sartre and respond to recent critiques They consider whether there is something in the self that precedes intersubjectivity and inquire into the relation between culture and consciousness the nature of shared meaning and social understanding the social dimension of shame and the nature of joint affordances They apply the notion of radical enactive cognition to evolutionary anthropology and examine the concept of the body in relation to culture in light of studies in such fields as phenomenology cognitive neuroscience psychology and psychopathology Through such investigations the book breaks ground for the study of the interplay of embodiment enaction and culture Contributors Mark Bickhard Ingar Brinck Anna Ciaunica Hanne De Jaegher Nicolas de Warren Ezequiel Di Paolo Christoph Durt John Z Elias Joerg Fingerhut Aikaterini Fotopoulou Thomas Fuchs Shaun Gallagher Vittorio Gallese Duilio Garofoli Katrin Heimann Peter Henningsen Daniel D Hutto Laurence J Kirmayer Alba Montes Sanchez Dermot Moran Maxwell J D Ramstead Matthew Ratcliffe Vasudevi Reddy Zuzanna Ruci ska Alessandro Salice Glenda Satne Heribert Sattel Christian Tewes Dan Zahavi

An Anthropology of Biomedicine Margaret M. Lock, Vinh-Kim Nguyen, 2018-01-09
In this fully revised and updated second edition of *An Anthropology of Biomedicine* authors Lock and Nguyen introduce biomedicine from an anthropological perspective exploring the entanglement of material bodies with history environment culture and politics Drawing on historical and ethnographic work the book critiques the assumption made by the biological sciences of a universal human body that can be uniformly standardized It focuses on the ways in which the application of biomedical technologies brings about radical changes to societies at large based on socioeconomic inequalities and ethical disputes and develops and integrates the theory that the human body in health and illness is not an ontological given but a moveable malleable entity This second edition includes new chapters on microbiology and the microbiome global health and the self as a socio technical system In addition all chapters have been comprehensively revised to take account of developments from within this fast paced field in the intervening years between publications References and figures have also been updated throughout This highly regarded and award winning textbook Winner of the 2010 Prose Award for Archaeology and Anthropology retains the character and features of the previous edition Its coverage remains broad including discussion of biomedical technologies in practice anthropologies of medicine biology and human experiments infertility and assisted reproduction genomics epigenomics and uncertain futures and molecularizing racial difference ensuring it remains the essential text for students of anthropology medical anthropology as well as public and global health

The Anthropology of Health and Healing Mari Womack, 2010 *The Anthropology of Health and Healing* provides the first holistic approach to the study of medical anthropology Over the past two decades medical anthropology has been the most rapidly growing subfield in anthropology and a number of medical anthropology texts have been published focusing primarily on public policy and health care delivery systems Yet while anthropologists have researched topics related to medical anthropology for more than one hundred years here Mari Womack thoroughly surveys this richly diverse field and provides an integrated approach that links together the biological psychological social communicative epidemiological philosophical historical and developmental factors that shape health and healing Book jacket

Extraordinary Conditions Janis H. Jenkins, 2015-09-15 With fine tuned ethnographic sensibility Jenkins explores the lived experience of psychosis trauma and depression among people of diverse cultural orientations eloquently showing how mental illness engages fundamental human processes of self desire gender identity attachment and meaning Her studies illustrate the shaping of human reality and subjectivity in light of extreme psychological suffering and shed light on psycho political processes of alterity precarity and repression in the social rendering of the mentally ill as non human or less than fully human

Extraordinary Conditions addresses the critical need to empathically engage the experience of persons living with conditions that are culturally defined as mental illness Jenkins compellingly shows that mental illness is better characterized in terms of struggle than symptoms and that culture matters vitally in all aspects of mental illness from onset to recovery Analysis at this edge of experience refashions the boundaries between ordinary and extraordinary routine and extreme healthy and pathological The book argues that the study of mental illness is indispensable to anthropological understanding of culture and experience and reciprocally that understanding culture and experience is critical to the study of mental illness While anthropology neglects the extraordinary to its theoretical and empirical peril psychiatry neglects culture to its theoretical and clinical peril Provided by publisher

Psychology, Mental Health and Distress John Cromby, David Harper, Paula Reavey, 2017-09-16 Is depression simply the result of chemical imbalances or Schizophrenia a wholly biological disorder What role do the broader

circumstances of an individual's social cultural and heuristic world play in the wider scheme of their psychological wellbeing. In this ground breaking and highly innovative text Cromby et al deliver an introduction to the biopsychosocial paradigm for understanding and treating psychological distress taking into consideration the wider contexts that engender the onset of mental illness and critiquing the limitations in the sole use of the biomedical model in psychological practice. Rather than biologically determined or clinically measurable readers are encouraged to consider mental illness as a subjective experience that is expressed according to the individual experiences of the sufferer rather than the rigidity of diagnostic categories. Similarly approaches to recovery expand beyond psychiatric medication to consider the fundamental function of methods such as psychotherapy, community psychology and service user movements in the recovery process. Offering a holistic account of the experience of psychological distress, this text draws upon not only statistical evidence but places an integral emphasis on the service user experience, anecdotal accounts of which feature throughout in order to provide readers with the perspective of the mental health sufferer. Taking an integrative approach to the psychology of mental health, the authors draw from a wealth of experience, examples and approaches to present this student friendly and engaging text. This is core reading for anyone serious about understanding mental health issues and is suitable for undergraduate students taking introductory courses in psychology and abnormal psychology.

Living on the Spectrum Elizabeth Fein, 2020-07-07 Honorable Mention 2020 Stirling Prize for Best Published Work in Psychological Anthropology given by the Society for Psychological Anthropology Honorable Mention New Millennium Book Award given by the Society for Medical Anthropology. How youth on the autism spectrum negotiate the contested meanings of neurodiversity. Autism is a deeply contested condition. To some it is a devastating invader harming children and isolating them. To others it is an asset and a distinctive aspect of an individual's identity. How do young people on the spectrum make sense of this conflict in the context of their own developing identity? While most of the research on Asperger's and related autism conditions has been conducted with individuals or in settings in which people on the spectrum are in the minority, this book draws on two years of ethnographic work in communities that bring people with Asperger's and related conditions together. It can thus begin to explore a form of autistic culture through attending to how those on the spectrum make sense of their conditions through shared social practices. Elizabeth Fein brings her many years of experience in both clinical psychology and psychological anthropology to analyze the connection between neuropsychological difference and culture. She argues that current medical models which espouse a limited definition are ill equipped to deal with the challenges of discussing autism related conditions. Consequently youths on the autism spectrum reach beyond medicine for their stories of difference and disorder, drawing instead on shared mythologies from popular culture and speculative fiction to conceptualize their experience of changing personhood. In moving and persuasive prose *Living on the Spectrum* illustrates that young people use these stories to pioneer more inclusive understandings of what makes us who we are.

Diagnostic Controversy Carolyn Smith-Morris, 2015-08-20 This collection is dedicated to the diagnostic moment and its unrivaled influence on encompassment and exclusion in health care Diagnosis is seen as both an expression and a vehicle of biomedical hegemony yet it is also a necessary and speculative tool for the identification of and response to suffering in any healing system Social scientific studies of medicalization and the production of medical knowledge have revealed tremendous controversy within and factitiousness at the outer parameters of diagnosable conditions Yet the ethnographically rich and theoretically complex history of such studies has not yet congealed into a coherent structural critique of the process and broader implications of diagnosis This volume meets that challenge directing attention to three distinctive realms of diagnostic conflict in the role of diagnosis to grant access to care in processes of medicalization and resistance and in the transforming and transformative position of diagnosis for 21st century global health Smith Morris's framework repositions diagnosis as central to critical global health inquiry The collected authors question specific diagnoses e g Lyme disease Parkinson's andropause psychosis as well as the structural and epistemological factors behind a disease's naming and experience
