School And Society Through Science Fiction:

School and Society Through Science Fiction Joseph D. Olander, Martin Harry Greenberg, Patricia S. Warrick, 1982
Originally published by Rand McNally in 1974 this volume investigates the applicability of science fiction to the study of social foundations of education and its problems The editors argue that science fiction is an ideal tool for analyzing the problems because it does not possess limitations on the nature of problematic inquiry its boundary of inquiry is subject only to that of the human imagination Science fiction offers the student of school and society a methodological tool by which man and his relationships actual and possible may be studied The possibility of ideas simply reinforces their probability and the link between the present and the future becomes the human imagination

Science Fiction and the Dismal Science Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-11-27
Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject

Exploring Climate Change through Science and in Society Mike Hulme, 2013-09-11
Mike Hulme has been studying climate change for over thirty years and is today one of the most distinctive and recognisable voices speaking internationally about climate change in the academy in public and in the media The argument that he has made powerfully over the last few years is that climate change has to be understood as much as an idea situated in different cultural contexts as it is as a physical phenomenon to be studied through universal scientific practices Climate change at its core embraces both science and society both knowledge and culture Hulme's numerous academic and popular writings have explored what this perspective means for the different ways climate change is studied narrated argued over and acted upon Exploring Climate Change through Science and in Society gathers together for the first time a collection of his most popular prominent and controversial articles essays speeches interviews and reviews dating back to the late 1980s The 50 or so short items are

grouped together in seven themes Science Researching Culture Policy Communicating Controversy Futures and within each theme are arranged chronologically to reveal changing ideas evidence and perspectives about climate change Each themed section is preceded with a brief introduction drawing out the main issues examined Three substantive unpublished new essays have been specially written for the book including one reflecting on the legacy of Climategate Taken as a collection these writings reveal the changes in scientific and public understandings of climate change since the late 1980s as refracted through the mind and expression of one leading academic and public commentator The collection shows the many different ways in which it is necessary to approach the idea of climate change to interpret and make sense of the divergent and discordant voices proclaiming it in the public sphere
