Rodriguez-Lainz, 2014-10-24 The study of migrant populations poses unique challenges owing to the mobility of these groups which may be further complicated by cultural educational and linguistic diversity as well as the legal status of their members These barriers limit the usefulness of both traditional survey sampling methods and routine public health surveillance systems Since nearly 1 in 7 people in the world is a migrant appropriate methodological approaches must be designed and implemented to capture health data from populations This effort is particularly important because migrant populations in comparison to other populations typically suffer disparities related to limited access to health care greater exposure to infectious diseases more occupational injuries and fewer positive outcomes for mental health and other health conditions This path breaking handbook is the first to engage with the many unique issues that arise in the study of migrant communities It offers a comprehensive description of quantitative and qualitative methodologies useful in work with migrant populations By providing information and practical tools the editors fill existing gaps in research methods and enhance opportunities to address the health and social disparities migrant populations face in the United States and around the world

Estate Landscapes in Northern Europe Signe Boeskov, Jonathan Finch, Mikael Frausing, 2019-07-01 Estate Landscapes in Northern Europe is the first study of the role of the landed estate as an agent in the shaping of landscapes and societies across northern Europe over the past five centuries Leading us into the fascinating variations of manorial worlds the present volume seeks to open the field to include a broader perspective on estate landscapes Estate or manorial landscapes were distinctive elements within the historic landscape and created their own character Marked by larger scale fields associated with the home or demesne farm as well as a higher proportion of woodland and timber trees the landscapes reflected the scale of the resources available to the landowner and the control they exerted over the local communities But they also represented the performative aspects of life for the elite such as their engagement with hunting While existing works have tended to emphasize the economic and agricultural aspect of estate landscapes this volume draws out the social cultural and political impact of manors and estates on landscapes throughout northern Europe The chapters provide insights into a broad range of histories such as the social worlds of burghers and nobility in the Dutch Republic or the relationship between the

distribution of land and the agitation for electoral reform in nineteenth century England Elsewhere in Scandinavia the impact of the reformation and conquest in Norway is balanced against the continuity of ownership in Sweden where developing the natural resources for industrial enterprise such as ironworks and sawmills brought in new owners Estate Landscapes in Northern Europe is the first product of the collaboration of researchers from Norway Germany Sweden the United Kingdom Denmark and the Netherlands joined together in the European Network for Country House and Estate Research

A Social and Economic History of Central European Jewry Yehuda Don, 2021-11-29 This volume is a pioneering effort to examine the social demographic and economic changes that befell the Jewish communities of Central Europe after the dissolution of the Habsburg Empire It consists of studies researched and written especially for this volume by historians sociologists and economists all specialists in modern Central European Jewish affairs The era of national rivalry economic crises and political confusion between the two World Wars has been preceded by a pre World War I epoch of Jewish emancipation and assimilation During that period Jewish minorities had been harbored from violent anti Semitism by the Empire and they became torchbearers of industrialization and modernization This common destiny encouraged certain common characteristics in the three major components of the Empire Austria Hungary and the Czech territories despite the

very different origins of the well over one million Jews in those three lands The disintegration of the Habsburg Empire created three small economically marginal national states inimical to each other and at liberty to create their own policies toward Jews in accord with the preferences of their respective ruling classes Active and openly discriminatory anti Semitic measures resulted in Austria and Hungary The only liberal heir country of the Empire was Czechoslovakia although simmering anti Semitism and below surface discrimination were widespread in Slovakia While one might have expected Jewish communities to return to their pre World War I tendencies to go their independent ways after the introduction of these policies social and economic patterns which had evolved in the Habsburg era persisted until the Anschluss in Austria German occupation in Czechoslovakia and World War II in Hungary Studies in this volume attest to continuing similarities among the three Jewish communities testifying to the depth of the Empire s long lasting impact on the behavior of Jews in Central Europe
