New Frontiers In Genetics:

New Frontiers in Cognitive Aging Roger A. Dixon, Lars Bäckman, Lars-Göran Nilsson, 2004 With an ever increasing population of aging people in the western world it is more crucial than ever that we try to understand how and why cognitive competence breaks down with advancing age why do some people follow normal patterns of cognitive change while others follow a path of progressive decline with neurodegenerative diseases such as Alzheimer's What can be done to prevent cognitive decline or to avoid neurodegenerative diseases The answers if they come will not emerge from research within one discipline but from work being done across a range of scientific and medical specialities This volume brings together leading experts from a range of fields studying cognitive aging including neuroscience pharmacology health genetics sensory biology and epidemiology Unlike other books in this area this book is more about new frontiers than past research and accomplishments Recently cognitive aging research has taken several new directions linking with and benefiting from rapid technological and theoretical advances in these neighbouring disciplines This book provides unique interdisciplinary coverage of the topic With each chapter including commentaries from specialists in related fields the book provides an integrative study of the topic For those within the fields of psychology cognitive neuroscience and geriatrics this volume will make an important contribution in furthering our understanding of a problem that affects us all

Genetic Technology: A New Frontier Assessment Office Of Technology, 2020-09-23 First published in 1982 This report examines the application of classical and molecular genetic technologies to micro organisms plants and animals This book is one of the first comprehensive documents on emerging genetic technologies and their implications for society The authors discuss the opportunities and problems involved describe current techniques and attempt to project some of the economic environmental and institutional impacts of those techniques The issues they raise go beyond those of technology utility and economic feasibility As we gain the ability to manipulate life we must face basic questions of just what life means and how far we can reasonably and safely allow ourselves to go
