Perna, 2020-08-31 Providing new perspectives on the interface between passion and entrepreneurship this book recognizes that entrepreneurship is not just based on the search for profit Instead the entrepreneurial experience incorporates more complex processes often based on less rational behavior motivated by reasons other than revenue Passion refers both to emotional elements that may fuel an entrepreneurial effort as well as something that feeds the business The book challenges established views and shows the complexity of the link between passion and entrepreneurship The authors discuss the main implications for businesses and explore how passion at the individual and community level influences entrepreneurial efforts Offering case studies from multiple sectors alongside conceptual frameworks this edited volume is a useful tool for scholars practitioners and policymakers working on entrepreneurship **The Psychology of Passion** Dr Robert J.

Vallerand, 2015-05-01 Winner of the 2017 APA William James Book Award The concept of passion is one we regularly use to describe our interests and yet there is no broad theory that can explain the development and consequences of passion for activities across people's lives In The Psychology of Passion Robert J Vallerand presents the first such theory providing a complete presentation of the Dualistic Model of Passion and the empirical evidence that supports it Vallerand conceives of two types of passion harmonious passion which remains under the person's control and obsessive passion which controls the person While the first typically leads to adaptive behaviors the obsessive form of passion leads to less adaptive and at times maladaptive behaviors Vallerand highlights the effects of these two types of passion on a number of psychological phenomena such as cognition emotions performance relationships aggression and violence He also discusses the development of passion and reviews a range of literature on passion for activities *Passion for Work* Robert J.

Vallerand, Nathalie Houliort, 2019-05-31 Passion is a pervasive concept in the work domain. Workers aspire to be passionate in the hope of finding meaning and satisfaction from their professional life while employers dream of passionate employees who will ensure organizational performance. Does passion for work matter? Does passion invariably bring about the anticipated positive outcomes or is there a darker side to passion for work that can also lead to negative outcomes for individuals and organizations? The goal of this book is to address these issues. This volume reviews major theories of work passion focusing specifically on the dominant theory, the Dualistic Model of Passion. This theory distinguishes between two types of passion: harmonious and obsessive, and their associated determinants and consequences. This volume provides a comprehensive understanding of passion for work by addressing the origin of the concept and its theoretical issues: how can passion for work be developed? what are the consequences to be expected at the individual and organizational levels and how can passion for work shed new light on contemporary issues in the workplace? *Passion for Work: Theory, Research, and Applications* synthesizes a vast body of existing research in the area, provides insights into new and exciting research avenues, and explores how passion for work can be cultivated in work settings in order to fulfill both workers' and employers' hopes for a productive and satisfying work life.
