The Present Tense in Modern Hindi Fiction Theo

Damsteegt, 2021-10-01 The Present Tense in Modern Hindi Fiction contributes to the interpretation of Hindi prose by analysing the use of the present tense in over 250 texts While sketching the history of the present tense in Hindi fiction the book focuses primarily on the narrative techniques that invite its use such as interior monologue free indirect discourse consonant psycho narration and camera eye Moreover it offers a fresh interpretation of the two types of present tense found in Hindi The indexes of authors titles and analytical concepts provide easy access to the analyses The book will also be of interest to scholars studying the use of the present tense in modern fiction worldwide The present tense is used more widely in Hindi than in languages such as English and some trends that are also found in the literatures of other languages such as the occurrence of the present tense in internal sensory focalisation are more clearly visible in Hindi fiction More importantly a new explanation of present tense passages is proposed which can also be applied elsewhere Insight into this technique referred to as Internal Focalisation of Awareness leads to a better understanding of present tense texts

More Than Words John Warner, 2025-02-04 A veteran writing teacher makes a moving Rick Wormeli argument

that writing is a form of thinking and feeling and shows why it can't be replaced by AI. In the age of artificial intelligence, drafting an essay is as simple as typing a prompt and pressing enter. What does this mean for the art of writing? According to longtime writing teacher John Warner, not very much. *More Than Words* argues that generative AI programs like ChatGPT not only can kill the student essay but should, since these assignments don't challenge students to do the real work of writing. To Warner, writing is thinking, discovering your ideas while trying to capture them on a page and feeling, grappling with what it fundamentally means to be human. The fact that we ask students to complete so many assignments that a machine could do is a sign that something has gone very wrong with writing instruction. *More Than Words* calls for us to use AI as an opportunity to reckon with how we work with words and how all of us should rethink our relationship with writing.
