Readings In Aging And Death:

Readings in Aging and Death Steven H. Zarit, 1977 A major purpose of the book is to explore the processes of development in the later years and their impact on people's lives This search is not without pain or disappointment however involvement with older persons will bring students into contact with people who often long for human contact who can be wise or sad or funny or foolish but who give us a sense of our past and a view of the present that otherwise would be lost to us There is a special delight in bridging over age differences with warmth and understanding In addition to our personal enrichment a balanced view of aging emphasizing both the continuing strengths and abilities as well as the difficulties that may confront the old is of value to the student who may enter a profession that directly serves older persons or who may work as a volunteer or for relating to one's parents when they are old Ultimately too we should gain some perspective on our own aging In this book there has been an attempt to present aging from a variety of perspectives in articles that are free from excessive professional jargon They have been chosen as reflective of the major issues in the field of gerontology Basic concepts of the aging process are presented in the initial two sections Readings in Aging and Death, 1977 **Aging** Harry R. Moody, 2006-01-13 Welcome to the world's most unique and dynamic textbook on aging Widely praised and adopted in previous editions the Fifth Edition of *Aging* once again presents key issues in an engaging and accessible fashion Organized unlike any other traditional textbook author Harry R. Moody presents basic concepts followed by controversies supported by carefully chosen adapted readings The result is the most captivating introduction to gerontology available today

Essential Readings in Infectious Disease Epidemiology Manya Magnus, 2009 *Essential Readings in Infectious Disease Epidemiology* Is A Collection Of Readings And Practice Exercises Designed To Complement The Methods Training Presented In The Main Text *Essentials Of Infectious Disease Epidemiology* Where The Parent Text Focuses On Methods This Book Provides Actual Readings And Examples On Which To Practice New Skills It May Also Be Used In Tandem With Any Introductory Or Intermediate Epidemiology Text To Give The Student Critical Skills In Reading And Interpretation The Readings Continue To Boil Down Tough Concepts In Infectious Disease Epidemiology Stripping Away Jargon And Replacing It With Key Concepts That May Be Applied To More Advanced Work In The Classroom Or In The Field The Book Is Uniquely Organized Around The Themes Of ID Epidemiology Rather Than By Chronology And Mirrors The Structure Of The Main Textbook To Create A More Engaging Experience For The Reader Each Excerpt Includes An Introduction To The Historic Or Cultural Context A Description Of The Take Home Message Of The Passage Excerpt Or Graph Suggested Study Questions Or Practice Problems Are Also Included *Cassell's illustrated readings* Cassell, Ltd, 1875 Wrestling With the Angel: A Memoir of My Triumph Over Illness Max Lerner, 1991-08-15 Journalist Max Lerner writes a stunningly honest account of the feelings and thoughts that marked his battle with two successive cancers and a heart attack Journal entries from this extraordinary ordeal show how mind and body interweave in the healing process A worthy companion to *Anatomy of an*

Illness Kirkus Reviews *Readings in Psychotherapy with Older People* Steven Steury, Marie L. Blank, 1977 **Shadow on the Steps** David Miano, 2010 *What Does It Mean to Grow Old?* Thomas R. Cole, 1987-08 In *What Does It Mean to Grow Old* essayists come to grips as best they can with the phenomenon of an America that is about to become the Old Country. They have been drawn from every relevant discipline: gerontology, social medicine, politics, health, anthropology, ethics, law, and asked to speak their mind. Most of them write extremely well and their sharply individual voices are heard. **The Demography and Epidemiology of Human Health and Aging** Jacob S. Siegel, 2011-09-30 With this book Siegel, an internationally known demographer and gerontologist, has made a unique contribution to the fledgling fields of health demography and the demography and epidemiology of aging. The book represents a felicitous union of epidemiology, gerontology, and demography and appears to be the first and only comprehensive text on this subject now available. Drawing on a wide range of sciences in addition to demography, gerontology, and epidemiology, including medical sociology, biostatistics, public policy, bioethics, and molecular biology, the author treats theoretical and applied issues, links methods and findings, covers the material internationally, nationally, and locally, and while focusing on the elderly, treats the entire life course. The methods, materials, and perspectives of demography and epidemiology are brought to bear on such topics as the prospects for future increases in human longevity, the relative contribution of life style, environment, genetics, and chance in human longevity, the measurement of the share of healthy years in total life expectancy, the role of population growth in the rising costs of health care, and the applications of health demography in serving the health needs of local communities. The separate chapters systematically develop the topics of the sources and quality of health data, mortality, life tables, and the measurement of health status, the interrelationships of health on the one hand and mortality, fertility, migration, and age structure on the other, health conditions in the less developed countries, the concepts and theories of aging, and projections of the aged population and local health applications, public health policy, and bioethical issues in health demography. Given its comprehensiveness, clarity, interdisciplinary scope, and authenticity, this book appeals to a wide range of users: from students and teachers of medical sociology, the demography of aging, and public health studies to practitioners in these areas, both as a text in health demography and the demography, epidemiology of aging, and as a reference work in these fields.
