Readings In Artificial Intelligence And Databases:

Readings in Artificial Intelligence and Databases John Mylopoulos, Michael L. Brodie, 2014-06-28 The interaction of database and AI technologies is crucial to such applications as data mining active databases and knowledge based expert systems This volume collects the primary readings on the interactions actual and potential between these two fields The editors have chosen articles to balance significant early research and the best and most comprehensive articles from the 1980s An in depth introduction discusses basic research motivations giving a survey of the history concepts and terminology of the interaction Major themes approaches and results open issues and future directions are all discussed including the results of a major survey conducted by the editors of current work in industry and research labs Thirteen sections follow each with a short introduction Topics examined include semantic data models with emphasis on conceptual modeling techniques for databases and information systems and the integration of data model concepts in high level data languages definition and maintenance of integrity constraints in databases and knowledge bases natural language front ends object oriented database management systems implementation issues such as concurrency control and error recovery and representation of time and knowledge incompleteness from the viewpoints of databases logic programming and AI

Database and Expert Systems Applications Dimitris Karagiannis, 2013-11-11 The Database and Expert Systems Applications DEXA conferences are dedicated to providing an international forum for the presentation of applications in the database and expert systems field for the exchange of ideas and experiences and for defining requirements for the future systems in these fields After the very promising DEXA 90 in Vienna Austria we hope to have successfully established with this year's DEXA 91 a stage where scientists from diverse fields interested in application oriented research can present and discuss their work This year there was a total of more than 250 submitted papers from 28 different countries in all continents Only 98 of the papers could be accepted The collection of papers in these proceedings offers a cross section of the issues facing the area of databases and expert systems i e topics of basic research interest on one hand and questions occurring when developing applications on the other Major credit for the success of the conference goes to all of our colleagues who submitted papers for consideration and to those who have organized and chaired the panel sessions Many persons contributed numerous hours to organize this conference The names of most of them will appear on the following pages In particular we wish to thank the Organization Committee Chairmen Johann Gordesch A Min Tjoa and Roland Wagner who also helped establishing the program Special thanks also go to Gabriella Wagner and Anke Ruckert Dimitris Karagiannis General Conference Chairman Contents Conference Committee

Algorithmic Learning Theory Klaus P.

Jantke, Shigenobu Kobayashi, Etsuji Tomita, 1993-10-20 Annotation This volume contains the papers that were presented at the Third Workshop on Algorithmic Learning Theory held in Tokyo in October 1992 In addition to 3 invited papers the volume contains 19 papers accepted for presentation selected from 29 submitted extended abstracts The ALT workshops have

been held annually since 1990 and are organized and sponsored by the Japanese Society for Artificial Intelligence. The main objective of these workshops is to provide an open forum for discussions and exchanges of ideas between researchers from various backgrounds in this emerging interdisciplinary field of learning theory. The volume is organized into parts on learning via query neural networks inductive inference analogical reasoning and approximate learning

Data Mining: A Heuristic Approach Abbas, Hussein A., Sarker, Ruhul, Newton, Charles S., 2001-07-01 Real life problems are known to be messy dynamic and multi objective and involve high levels of uncertainty and constraints. Because traditional problem solving methods are no longer capable of handling this level of complexity heuristic search methods have attracted increasing attention in recent years for solving such problems. Inspired by nature biology statistical mechanics physics and neuroscience heuristics techniques are used to solve many problems where traditional methods have failed. Data Mining A Heuristic Approach will be a repository for the applications of these techniques in the area of data mining

Readings in Object-Oriented Database Systems Stanley B. Zdonik, David Maier, 1990 This comprehensive collection is a survey of research in object oriented databases offering a substantive overview of the field. Section introductions and over 40 research papers presented in their original scope and detail. The balanced selection of articles presents a confluence of ideas from both the language and database research communities that have contributed to the object oriented paradigm. The editors develop a general definition and model for object oriented databases and relate significant research efforts to this framework. Further the collection explores the fundamental notions behind object oriented databases semantic data models implementation of object oriented systems transaction processing interfaces and related approaches. Research and theory are balanced by applications to CAD systems programming environments and office information systems

Strategic Database Technology Alan R. Simon, 1995 Noted consultant Alan Simon's 11th book explores the potential of current and emerging database technologies. Technically serious but not technically detailed this book is designed to give information managers and others an overview of the trends and technologies for use in the years ahead so that they can be incorporated into the manager's plans today

Handbook on Architectures of Information Systems Peter Bernus, Kai Mertins, Günter Schmidt, 2013-03-14 This book is the first volume of a running series under the title International Handbooks on Information Systems. The series is edited by Peter Bemus Jacek Blazewicz Günter Schmidt and Mike Shaw. One objective is to give state of the art surveys on selected topics of information systems theory and applications. To this end a distinguished international group of academics and practitioners are invited to provide a reference source not only for problem solvers in business industry and government but also for professional researchers and graduate students. It seemed appropriate to start the series with a volume covering some basic aspects about information systems. The focus of the first volume is therefore architectures. It was decided to have a balanced number of contributions from academia and practitioners. The structure of the material follows a differentiation between modelling languages tools and methodologies. These are collected into

separate parts allowing the reader of the handbook a better comparison of the contributions. Information systems are a major component of the entire enterprise and the reader will notice that many contributions could just as easily have been included in another volume of the series which is on enterprise integration. Conversely some traditionally information systems topics as organisational analysis and strategic change management methods will be treated in more depth in the Handbook on Enterprise Integration. The two volumes will complement each other.

Proceedings of the Second International Workshop on Database Programming Languages Richard Hull, Ronald Morrison, David Stemple, 1990

Logic Programming and Databases Stefano Ceri, Georg Gottlob, Letizia Tanca, 2012-12-06. The topic of logic programming and databases has gained in creasing interest in recent years. Several events have marked the rapid evolution of this field: the selection by the Japanese Fifth Generation Project of Prolog and of the relational data model as the basis for the development of new machine architectures; the focusing of research in database theory on logic queries and on recursive query processing and the pragmatic application oriented development of expert database systems and of knowledge base systems. As a result an enormous amount of work has been produced in the recent literature coupled with the spontaneous growth of several advanced projects in this area. The goal of this book is to present a systematic overview of a rapidly evolving discipline which is presently not described with the same approach in other books. We intend to introduce students and researchers to this new discipline thus we use a plain tutorial style and complement the description of algorithms with examples and exercises. We attempt to achieve a balance between theoretical foundations and technological issues thus we present a careful introduction to the new language Datalog but we also focus on the efficient interfacing of logic programming formalisms such as Prolog and Datalog with large databases.

Towards SQL Database Language Extensions for Geographic Information Systems Vincent B. Robinson, Henry Tom, 1998-04. Chapters on heterogeneous GIS architectures, spatial data models, transactions database language SQL, emerging features for GIS applications, proposed spatial data handling extensions to SQL, a GIS perspective on spatial conceptual folding/unfolding of spatial data for spatial queries. Illustrated.

Readings In Artificial Intelligence And Databases Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Readings In Artificial Intelligence And Databases free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge.
