Back to the Future: *Personality and Assessment* and Personality Development

Brent W. Roberts

University of Illinois, Urbana-Champaign

Abstract

In this essay I consider the future of personality development in light of the past effects of *Personality and Assessment* on the field of personality in general and personality development in particular. The essay is organized around 1) the effect of Mischel's book on the foundational theories informing personality development; 2) definitions of personality traits; 3) an alternative model of personality traits, described as the sociogenomic model of personality traits, that can bridge the divide that still characterizes the field of personality development; 4) the application of the sociogenomic model of personality traits to issues of personality trait development, and 5) a "Newtonian" vision for the future of personality psychology.

"Those tests, including the ubiquitous Myers-Briggs test, have no scientific credibility or predictive value, as Annie Murphy Paul showed in her 2005 book.... You can have one Myers-Briggs personality on Tuesday and another when you retake the test on Thursday"

Barbara Ehrenreich (2006)

"Traits that change are not traits at all, one might argue"

John Moore (personal communication 2-21-08).

Beyond their focus on the validity, or lack thereof, and the consistency of personality traits, some might ask why these quotes are relevant to a special issue dedicated to *Personality and Assessment*, as they are from individuals outside of the guild of personality psychology. That is exactly the point. These quotes reflect, in no uncertain terms, the reach and impact of Mischel's argument laid out in *Personality and Assessment*. That is, the perspective that personality traits lack validity and are defined by "invariance" across situations is so widely held that these ideas have traction well outside of the field of personality psychology. One cannot give Mischel full credit for these positions, as the critiques of personality traits have been legion. Nonetheless, to have such influence is an incredible achievement.

The focus of my paper will be to address how the legacy of *Personality and Assessment* will affect the future of the particular domain of personality development. Looking to the future entails having a good grasp of the past. It would be uncontroversial to state that the effect of *Personality and Assessment* was twofold: 1) it bred an antagonism toward personality traits, and 2) it popularized social cognitive approaches and units of analysis. How has this past
