Ready for Learning and Ready for Life Betsy Gunzelmann, 2016-12-19 Many of our children are poorly prepared to face the challenges of school and growing up in our complex society The term readiness is misrepresented in the field of education this book implies a different type of readiness involving a process that can be taught and nurtured within each child Going beyond what our schools typically assess to determine readiness to attend school which is often based upon age this book addresses the synergistic aspects of readiness learning and adaptation that allow children to be optimally ready to learning and capable of handling for challenges and transitions This more holistic and interactive understanding of readiness involves not only the typical physical development but also psychological aspects including the cognitive emotional spiritual behavioral and environmental pieces The goal of this book is to provide the necessary lens through which we can see what is really hindering many children in schools today along with possible approaches and interventions typically not seen as educational in nature but what may be just the needed prescription for our ailing youth
