Layers of Modality

Ana Werkmann Horvat, 2021-10-25 Much of the literature on modality focuses at least implicitly on the occurrence of single modal auxiliaries However cross linguistically modal auxiliaries can co occur with one another but under interesting restrictions This monograph examines layered modal constructions and the semantic restrictions under which they combine The main puzzle addressed in the book is the question of ordering restrictions among modal auxiliaries and whether these have any semantic consequences and finally what the conceptual rationale is behind these restrictions Based on the data from Croatian the central proposal is that modal restrictions depend heavily on both modal force and flavour and combine according to a hierarchy that can possibly be extended cross linguistically since it rests on the basis of the conceptual and logical reality of human language The book also offers an in depth overview of the literature on layered modal constructions as well as a valuable and extensive set of analyzed data which will be of great interest for researchers interested in verbal systems modality and Slavic languages

Brand New Justice Simon Anholt, 2005 Recently vilified as the prime dynamic driving home the breach between poor and rich nations here the branding process is rehabilitated as a potential saviour of

the economically underprivileged Brand New Justice now in a revised paperback edition systematically analyses the success stories of the Top Thirteen nations demonstrating that their wealth is based on the last mile of the commercial process buying raw materials and manufacturing cheaply in third world countries these countries realise their lucrative profits by adding value through finishing packaging and marketing and then selling the branded product on to the end user at a hugely inflated price The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process Applying his observations on economic history and the development and impact of global marketing Anholt presents a cogent plan for developing nations to benefit from globalization So long the helpless victim of capitalist trading systems he shows that they can cross the divide and graduate from supplier nation to producer nation Branding native produce on a global scale making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the last mile benefits are key to this graduation and fundamental to forging a new global economic balance Anholt argues with a forceful logic but also backs his hypothesis with enticing glimpses of this process actually beginning to take place Examining activities in India Thailand Russia and Africa among others he shows the risks challenges and pressures inherent in turning the tide but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms
