Transactions of the Medical Society of the State of New York Medical Society of the State of New York (1807-1898) Title of papers addresses c from 1807 to 1874 1875 p 94 111 **The Advancement of Science : Science without Legend, Objectivity without Illusions** San Diego Philip Kitcher Professor of Philosophy University of California, 1993-05-06 During the last three decades reflections on the growth of scientific knowledge have inspired historians sociologists and some philosophers to contend that scientific objectivity is a myth In this book Kitcher attempts to resurrect the notions of objectivity and progress in science by identifying both the limitations of idealized treatments of growth of knowledge and the overreactions to philosophical idealizations Recognizing that science is done not by logically omniscient subjects working in isolation but by people with a variety of personal and social interests who cooperate and compete with one another he argues that nonetheless we may conceive the growth of science as a process in which both our vision of nature and our ways of learning more about nature improve Offering a detailed picture of the advancement of science he sets a new agenda for the philosophy of science and for other science studies disciplines *Innovative CSR* Céline Louché, Samuel Idowu, Walter Filho, 2017-09-08 By and large corporations of the 21st century have come to realise that their obligations to societies in terms of corporate social responsibility are fourfold economic ethical altruistic and strategic Meeting these four responsibilities is crucial to their survival in their various markets and industries it also requires them to rewrite their previously less socially responsible business models in order to do so All indications continue to suggest that it is those organisations that are perceived to be socially responsible by stakeholders in modern markets that survive and prosper Corporations have equally realised that by being innovative in all things including their CSR activities and initiatives they will add value to the so called bottom line to the positive contributions they make to society and to how they are perceived by their key stakeholders However many criticisms have been made of CSR in its current form often related to the lack of value that it generates within the enterprise and the fact that it offers only a partial and short term response to the full challenges of sustainable development The time has come to shift the CSR focus away from risk management towards a more progressive and entrepreneurial approach that seeks to create value and identify sustainable opportunities for strategic innovation This book aims to explore inspire and support creative innovative and strategic CSR Innovation in this book means new products services and technologies and in addition new organisational and institutional systems structures and new business models that empower the organisation to advance strategically in an ever more competitive business world Both research and practice show that CSR has mainly been approached in terms of value protection and risk management where the main objective has been to protect companies existing assets or avoid scandals Therefore in many cases where CSR remains at the forefront of business activity it does not lead to fundamental changes and is not yet integrated as a strategic component where it could create value generate new ideas and open new opportunities How do corporate entities shift their

attention from risk management to value creation This is the key question that this book attempts to answer both theoretically and empirically as well as through real case studies and experiences With contributions from a crème de la crème of scholars from 12 countries Innovative CSR gathers together a cornucopia of innovative practices that will be essential reading for academics and practitioners alike **Validity and Social Experimentation** Leonard Bickman,2000-01-21

Annotation Leading social research methodologists and evaluators address the issues of validity research design and social experimentation in this first of two volumes inspired by the work of Donald Campbell and sponsored by the American Evaluation Association The first part of the book focuses on three types of validity external construct and statistical Much attention is given to meta analysis statistical testing and effect sizes The second part is a major critique of Campbell's vision and practice of social experimentation Contributors review and extend Campbell's ideas concentrating on their relevance to evaluation and social intervention and seeking to define an experimenting society **Identifying Exclusionary Abuses by**

Contemporary Philosophy of Religion Eugene Thomas Long,2012-12-06 This collection of original articles written by leading contemporary European and American philosophers of religion is presented in celebration of the publication of the fiftieth volume of the International Journal for Philosophy of Religion Following the Editor's Introduction John Macquarrie Adriaan

Peperzak and Hent de Vries take up central themes in continental philosophy of religion Macquarrie analyzes postmodernism and its influence in philosophy and theology Peperzak argues for a form of universality different from that of modern philosophy and de Vries analyzes an intrinsic and structural relationship between religion and the media The next three essays discuss issues in analytic philosophy of religion Philip Quinn argues that religious diversity reduces the epistemic status of exclusivism and makes it possible for a religious person to be justified while living within a pluralistic environment William Wainwright plumbs the work of Jonathan Edwards in order to better understand debates concerning freedom determinism and the problem of evil and William Hasker asks whether theological incompatibilism is less inimical to traditional theism than some have supposed Representing the Thomist tradition Fergus Kerr challenges standard readings of Aquinas on the arguments for the existence of God David Griffin analyzes the contributions of process philosophy to the problem of evil and the relation between science and religion Illustrating comparative approaches Keith Ward argues that the Semitic and Indian traditions have developed a similar concept of God that should be revised in view of post Enlightenment theories of the individual and the historical Keith Yandell explores themes in the Indian metaphysical tradition and considers what account of persons is most in accord with reincarnation and karma doctrines Feminist philosophy of religion is represented in Pamela Anderson's article in which she argues for a gender sensitive and more inclusive approach to the craving for infinitude

The Beginnings of the Cult of Relics Robert Wiśniewski, 2019 Christians have often admired and venerated the martyrs who died for their faith but for a long time thought that the bodies of martyrs should remain undisturbed in their graves Initially the Christian attitude towards the bones of the dead saint or not was that of respectful distance The Beginnings of the Cult of Relics examines how this attitude changed in the mid fourth century Robert Wiśniewski investigates how Christians began to believe in the power of relics first over demons then over physical diseases and enemies He considers how the faithful sought to reveal hidden knowledge at the tombs of saints and why they buried the dead close to them An essential element of this new belief was a strong conviction that the power of relics was transferred in a physical way and so the following chapters study relics as material objects Wiśniewski analyses how contact with relics operated and how close it was Did people touch kiss or look at the very bones or just at tombs and reliquaries which contained them When did the custom of dividing relics begin Finally the book deals with discussions and polemics concerning relics and attempts to find out the strength of the opposition which this new phenomenon had to face both within and outside Christianity on its way to become an essential element of medieval religiosity
