F-35 In Service Gerard Keijsper, 2024-11-30 A highly illustrated study of one of the most most lethal survivable and connected fighter jets in the world The origins of the F 35 and the amazing challenges the industry had to be overcome go back to a still secret NATO study that evaluated the vulnerability of air force bases in the West This spurred development for Short Take off and Vertical Landing STOVL fighter aircraft Only two aircraft with this capability actually entered service the British Harrier and the Russian Yak 38 However these aircraft lacked supersonic capability which made them vulnerable to faster fighters So a program was initiated for a supersonic STOVL fighter but the trail of unsuccessful efforts was long NASA as well as the defense Evaluation and Research Agency and private industry studied advanced STOVL propulsion ideas but without tangible result It was only when the Defense Advanced Research Projects Agency at the request of the Marine Corps issued study contracts for a supersonic STOVL fighter to American industry that real progress began to be made It was Lockheed Martin that came up finally came up with a design that resulted in the remarkable F 35 also known as the Joint Strike Fighter In this book Gerard Keijsper explores the long and difficult journey that customers led to buying the Lockheed Martin F 35 Gerard reveals the story of the F 35 in service and why it is often described as an international aircraft First flown on 15 December 2006 the F 35 achieved Initial

Operational Capability with the US Marine Corps in July 2015 being followed soon after in August 2016 by the USAF The US Navy meanwhile reached this milestone in February 2019 Other nations that have since purchased the F 35 include the United Kingdom for both the RAF and the Royal Navy Israel under which service the type undertook its first combat mission in 2018 Australia Denmark the Netherlands Norway Japan South Korea and Italy There is also a long list of potential customers This then is a fascinating and highly illustrated study of the F 35 in service which in Lockheed Martin s own words is the most lethal survivable and connected fighter jet in the world *Sessional Papers* Great Britain. Parliament. House of Commons,1983 Frog Tales Mark D Holroyd,2013 We have all heard stories where somebody heard somebody say that they did such and such and the story seems so outlandish it can t be true Well here is a lifetime spent living some of those stories The reader will be transported 600 miles out in the Atlantic Ocean and experience the horror of realising that the helicopter your only means of getting back to your ship has just inexplicably flown off over the horizon leaving you floating in a pond where you are now considered food Or trying to cut your way out of a fishing net that is pressing you down onto the unforgiving shell of a 2000lb WW2 German bomb in visibility that is so bad you can t tell the difference between dark and light up or down or even which way the surface of the water is Climbing down a cliff to recover a hand grenade from under a dead body that has been lying on top of it for 3 months Then moving a bomb across a building site that is so sensitive spirit levels had to be taped to the top of it to keep it level so it won t detonate while only 30m away the UK firework championship contenders have laid out over 80 tons of fireworks in preparation for a three day display Only three hours before this task began he was dealing with a hand grenade in a shop that was full of gas after the resident had torn the gas metre off the wall because of a dispute with his landlord This is the stuff films are made of only films like this would clearly have to be put in the fiction genre surely people don t do this kind of thing for real Mark D Holroyd has spent 24 years as a Clearance Diver in the British Royal Navy His stories are a reflection on a life spent in situations most people would find hard to comprehend from a diving course where at least 60% of those attempting the course are expected to fail To escaping from sunken helicopters in complete darkness this is life on the edge as part of a small elite group of men who make up this secretive part of the Royal Navy When things get bad and the situation is dire humour is sometimes all that keeps men sane
