The History of Cartography, Volume 6

Mark Monmonier,2015-05-18

For more than thirty years the History of Cartography Project has charted the course for scholarship on cartography bringing together research from a variety of disciplines on the creation dissemination and use of maps Volume 6 Cartography in the Twentieth Century continues this tradition with a groundbreaking survey of the century just ended and a new full color encyclopedic format The twentieth century is a pivotal period in map history The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps Satellite positioning and mobile communications revolutionized wayfinding Mapping evolved as an important tool for coping with complexity organizing knowledge and influencing public opinion in all parts of the globe and at all levels of society Volume 6 covers these changes comprehensively while thoroughly demonstrating the far reaching effects of maps on science technology and society and vice versa The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images Hundreds of expert contributors provide both original research often based on their own participation in the developments they describe and interpretations of larger trends in cartography Designed for use by both scholars and the general public this definitive volume is a reference work of first resort for all who study and love maps

The Secret History of the Roman Roads of Britain

M.C. Bishop,2014-02-28 There have been many books on Britain s Roman roads but none have considered in any depth their long term strategic impact Mike Bishop shows how the road network was vital not only in the Roman strategy of conquest and occupation but influenced the course of British military history during subsequent ages The author starts with the pre Roman origins of the network many Roman roads being built over prehistoric routes before describing how the Roman army built developed maintained and used it Then uniquely he moves on to the post Roman history of the roads He shows how they were crucial to medieval military history try to find a medieval battle that is not near one and the governance of the realm fixing the itinerary of the royal progresses Their legacy is still clear in the building of 18th century military roads and even in the development of the modern road network Why have some parts of the network remained in use throughout The text is supported with clear maps and photographs Most books on Roman roads are concerned with cataloguing or

tracing them or just dealing with aspects like surveying This one makes them part of military landscape archaeology **A Century of British Geography** Ron Johnston, Michael Williams, British Academy, 2003-09-11 These essays trace the evolution of British geography as an academic discipline during the last hundred years and stress how the study of the world we live in is fundamental to an understanding of its problems and concerns Never before has such an ambitious and wide ranging review been attempted and never before has it been done with so much knowledge and passion The principal themes covered in this volume are those of environment place and space and the applied geography of map making and planning The volume also addresses specific issues such as disease urbanization regional viability and ethics and social problems This lively and accessible work offers many insights into the minds and practices of today's geographers **Appreciating Physical Landscapes** T.A. Hose ,2016-02-01 Geotourism as a form of sustainable geoheritage tourism was defined and developed from the early 1990s to contextualize modern approaches to geoconservation and physical landscape management However its roots lie in the late seventeenth century and the emergence of the Grand Tour and its domestic equivalents in the eighteenth century Its participants and numerous later travellers and tourists including geologists and artists purposefully explored wild landscapes as geotourists The written and visual records of their observations underpin the majority of papers within this volume these papers explore some significant geo historical themes organizations individuals and locations across three centuries opening with seventeenth century elite travellers and closing with modern landscape tourists Other papers examine the resources available to those geotourists and explore the geotourism paradigm The volume will be of particular interest to Earth scientists historians of science tourism specialists and general readers with an interest in landscape history *Maps for Historians* Brian Paul Hindle, 1998 Old maps provide a rich source of information for all those interested in their local history and they are also a popular field for collectors Dr Hindle's describes the different types of map produced explains what they were intended to show and where to find them **The Emergence of Bicycling and Automobility in Britain** Craig Horner, 2021-01-28 In the late 19th century bicycling and motoring offered new ways for a hardy minority to travel Escaping from the tyranny of the train timetables these entrepreneurs were able to promote private mobility when the road technology and infrastructure were unequal to the task With a moribund network out of town poor roadside accommodation and few services how could road traction persist and ultimately thrive Drawing on a wealth of primary sources including magazines newspapers and advice books on stable management this book explores the emergence and development of bicycling and automobility in Britain with a focus on the racing driver cum entrepreneur SF Edge 1868 1940 and his network Craig Horner considers the motivations prejudices and cultures of those who promoted and consumed road traction providing new insights into social class leisure sport and tourism in Britain In addition he places early British bicycling and automobility in an international context providing fruitful comparisons with the movements in France Germany and the United States The Emergence of Bicycling and Automobility in Britain is an excellent resource for scholars and

students interested in mobility studies social and cultural history and the history of technology The Car and British Society Sean O'Connell,1998 The car was first introduced into British society over one hundred years ago Sean O'Connell's study of the social impact of the car offers a radical new way of looking at the history of motoring Guide to Reference in Genealogy and Biography Mary K. Mannix,Fred Burchsted,2015-01-14 Profiling more than 1400 print and electronic sources this book helps connect librarians and researchers to the most relevant sources of information in genealogy and biography

Mapping the Subject Steve Pile,Nigel Thrift,2005-11-22 Rejecting static and reductionist understandings of subjectivity this book asks how people find their place in the world Mapping the Subject is an inter disciplinary exploration of subjectivity which focuses on the importance of space in the constitution of acting thinking feeling individuals The authors develop their arguments through detailed case studies and clear theoretical expositions Themes discussed are organised into four parts constructing the subject sexuality and subjectivity the limits of identity and the politics of the subject There is here a commitment to mapping the subject a subject which is in some ways fluid in other ways fixed which is located in constantly unfolding power knowledge and social relationships This book is moreover about new maps for the subject *On the Slow Train Again* Michael Williams,2011-04-07 Michael Williams has spent the past year travelling along the fascinating rail byways of Britain for this new collection of journeys Here is the train to the end of the world running for more than four splendid hours through lake loch and moorland from Inverness to Wick the most northerly town in Britain He discovers a perfect country branch line in London's commuterland and travels on one of the slowest services in the land along the shores of the lovely Dovey estuary to the far west of Wales He takes the stopping train across the Pennines on a line with so few services that its glorious scenery is a secret known only to the regulars Here too is the Bittern Line in Norfolk and the Tarka Line in North Devon as well as the little branch line to the fishing port of Looe in Cornwall rescued from closure in the 1960s and now celebrating its 150th anniversary taking families on holiday to the seaside From the most luxurious and historic aboard the Orient Express to the most futuristic on the driverless trains of London's Docklands Light Railway here is a unique travel companion celebrating the treasures of our railway heritage from one of Britain's most knowledgeable railway writers Books in Print Supplement ,1994 British and Irish Archaeology ,1994 **The British Library General Catalogue of Printed Books, 1986 to 1987** British Library,1988 **Writers' and Artists' Year-book** ,1991 **Public Library Catalog** Juliette Yaakov,2004 More than 8 000 books in the main volume More than 2 400 new titles in annual paperbound supplements More than 2 000 analytic entries for items in collections and anthologies **Bibliographic Guide to Maps and Atlases** ,1997 **Cartographic Grounds** Charles Waldheim,Jil Desimini,2016-06-28 Mapping has been one of the most fertile areas of exploration for architecture and landscape in the past few decades While documenting this shift in representation from the material and physical description toward the depiction of the unseen and often immaterial Cartographic Grounds takes a critical view toward the current use of data mapping and visualization and calls for a return to

traditional cartographic techniques to reimagine the manifestation and manipulation of the ground itself Each of the ten chapters focuses on a single cartographic technique sounding spot elevation isobath contour hachure hatch shaded relief land classification figure ground stratigraphic column cross section line symbol conventional sign and illustrates it through beautiful maps and plans from notable designers and cartographers throughout history from Leonardo da Vinci to James Corner Field Operations Mohsen Mostafavi dean of the Harvard Graduate School of Design introduces the book

Cartographies of Travel and Navigation James R. Akerman, 2010-11-15 Finding one's way with a map is a relatively recent phenomenon In premodern times maps were used if at all mainly for planning journeys in advance not for guiding travelers on the road With the exception of navigational sea charts the use of maps by travelers only became common in the modern era indeed in the last two hundred years maps have become the most ubiquitous and familiar genre of modern cartography Examining the historical relationship between travelers navigation and maps *Cartographies of Travel and Navigation* considers the cartographic response to the new modalities of modern travel brought about by technological and institutional developments in the twentieth century Highlighting the ways in which the travelers operators and planners of modern transportation systems value maps as both navigation tools and as representatives of a radical new mobility this collection brings the cartography of travel by road sea rail and air to the forefront placing maps at the center of the history of travel and movement Richly and colorfully illustrated *Cartographies of Travel and Navigation* ably fills the void in historical literature on transportation mapping
